France spends upward of \$600,000 year on horses for her great armies. As a general rule, the recruits are five years old and cost \$200 each.

### WOULD BAR THE WEALTHY.

Woman Ascetic Goes to Extremes in

Whatever may be said about womonly true ascetic is a woman. Miss. Martha Bortle, preacher and club woman of Washington, is the latest hearers gasp. Evidently Miss Bortle mixer; iron flat clothes with a mangle accepts literally the parable of the and starched ones with special irons rich man being in the same predications over adapted boards.

The parable of the angle starched ones with special irons over adapted boards.

We do many things better and easier, through the needle's eye for she said. hurches in the slums, but I would with the notice: 'No persons wearing No one who rides in a carriage shall who walk or ride in a street car are

former mistress of an intelligent litpet. When the dog was taken sick bor until her owner gave her to the his mistress summoned at once a vet erinarian, who did everything possible Mr. Spencer, superintendent of the to save the animal, but all to no pure aquarium, fed her a pandful of killies, eiged upon a suggestion made half in and adults. jest by a friend that she have the regated to secure the services of assistnts, and the ashes, after the ceremony, were incased in a handsome bronze vase, which now rests on a table in the drawing room of the woman. Beside the urn stands the picture of the little dog, taken when he was standing at attention at the command of his mistress.

An Explanation.

A Buffalo man recently consulted a and the prescription written out, he asked what fee was expected. \_\_\_\_Three\_dollars,"\_said\_the.\_\_young

Whereupon the caller produced a ten-dollar gold piece, which he proffered the doctor in payment of his fee. The physician looked annoved Haven't you anything smaller?" he asked-plaintively.-

"Nothing smaller, except a two-doliar bill." said the patient.

"Then give me that," said the doctor. "If I take the ten-dollar gold piece I shall be out seven dollars. I have promised my wife that all gold shall be here that I take in the wayof fees."

Circuit Through Horses' Bodies. Startling as some of the recent developments in the field of communication by means of electricity have been, none is more unique and tinexpected than that recently perfected by First Lieut. A. C. Knowles of the United States army, in which he uses the bodies of living cavalry horses as a part of his telegraph circuit. By officer at headquarters to communi cate with a scouting party on a gal-lop, recalling them or changing the orlers as expedient.—Popular Mechinics.

The Goose and the Telephone. In the Falkland islands, according to an official report, a telephone line s being constructed, under an agree ment entered into by the government with the Falkland Islands company, between Stanley and the company's station at Darwin. The upland goose has proved to be a source of trouble in carrying out the work, the force with which the bird, in the course o its flight sometimes strikes the wire,

The Resson.

"I can't keep track of my neighbors at all, any more."-

"No, but my friend, Mrs. Gadabout, and go on a little whaling expedition."

The walls were all there.

England just now fully held it between her flippers while eating it.

Swimmer's "Gramps." — "You-often-hear of people—dying from cramps while in swimming," said James D. Rose of Martin, Tenn. "Peodon't die from cramps while in ling. The water gets in the ears, hathing. floods the ear drum, and causes the nerves leading to the brain to become A Buffalo man recently consulted a paralyzed. This naturally forces other youthful physician in that city, and vital nerves to cease performing thefr ple who go in swimming would put makers of underwear or socks draw. skull of William V. Albright, who fell cotton in their ears the number of ers and undershirts. Why do they put from the elevated structure being deaths from gramps would be much the high the structure being smaller. This information was imparted to me several years ago by an old
German physician in the mountains,
and who was an intelligent but queer

"Have you not often had your unindividual. Whenever I go in swimming I always put cotton in my ears,

and I'm never afraid of having cramps." Desiring and Attaining.

Between desire and attaining all human life flows on throughout. The wish is, in its nature, pain; the attainment soon begets satiety, the end was only apparent; possession takes away the charm: the wish, the need, presents itself-under a new form, when it does not, then follow desolateness, emptiness, ennul—against which the conflict is just as painful as against want. That wish and satisfaction should-follow-each-other-neither-too quickly nor too slowly, reduces the smallest amount of suffering which both occasion, and constitutes the happiest life .- Arthur Schopenhauer.

"I am tired of these predictions and promises of a great epochal change in favor of the people," murmured the fair girl with social theories for her latest fad. "I want to see the great solatest fad. "I want t

TOWED BY A TURTLE

Monster Turned the Tables on His Would-Be Captor.

William Genung, a Pennsylvania vent fishing at Se 52 weakfish, and on account of luck being good he concluded to try for a turtle. "Bill" didn't figure, however, that he was going to get a big fellow on his line, so he used a small hook. Directly, says the dispatch from "Bill's" home at Elizabeth, N. J., he felt something tugging at his line. Bill" wanted it if it was a turtle, and line tightly about his arm. Then there was a something like what "Bill" called a sudden jerk, but it wasn't. It was just a plain pull. But there was strength back of it and in an instant "Bill" was jerked out of his boat and into the water. The 52 fish went with

him.
When "Bill" fell into the water his soon he was being towed out to sea by a monster turtle. He was so entangled that all his efforts to extricate himself proved futile and only his skill as a swimmer kept him afloat. For several hundred yards he was towed, and he was getting tired out, when his cries attracted two other fishermen. George Clemons and Wil carried Genung ashore in a rowboat

FELT DANGER AT HAND. German Savant Tells of Experience in

Earthquake Country. Hans Doring writes of a singular ex perience in an earthquake while traveling in the desert of Gobi: "I had ·lust dropped off to sleep, when I woke great danger was impending. It was explained soon enough. All of a sudmy sudden fear came, I heard a loud noise beneath the ground which sounded-as-lf-a\_subterranean-express was on which I had been sleeping the comshaken by an earthquake. I thought that my last hour had come and expected to see the walls collapse. The rafters of the roof rattled on the have collapsed, but the walls, not quite ten feet high, are built of mud. with an elastic framework of wood to houses are built to resist earthquakes

Soon we shall know how works in practice the often-advocated plan of letis well-convinced-that the initiative and referendum is wise, but hesitates to adopt it because the whole of the country, or none, must undergo the experiment. For the United States the experience of Oklahoma will soon furnish a guide as to just how the general principle must be altered and adapted to be made practical.-Col-

An idea.

derwear prick you, the knots bruise you, the seams set up an itching? Well, all that could be abolished. The uside of underwear should be turned

outside. "Looks is the only possible objection to my idea. But, after all, in un-derwear, which is invisible, comfort means more than looks."

A friend of mine has a little girl four years old, who has acquired the habit of calling her mother and father by their first names instead of "mamma" or "papa." The child sleeps in a crib besides her parents and is wide awake every-morning when her mother wakes the father telling him it's time to go to business, the six o'clock whistle has blown, says writer in an eastern magazine. One morning the child heard the whistle but the mother did not, and after waiting a short time baby put her hand through the bars of her crib and pulling the father's arm cried:

Electric Anesthesia. Electric sleep, or anesthesia, produced by the action on the brain of intermittent electric currents of low voltage, has been a subject of special study for several years by Prof. Stephanic Leduc of Nantes and others. The application has been perfected until it is practicable to put dogs and rabbits quickly into a calm and regular sleep, with general and complete anesthesia.—Electricity.

go around fast enough? Gunbacta He's a gas meter in-

EXPLORING THE UPPER AIR. THE GREATEST CURE Scientists Have a Great Deal to Learn Plainly, electricity has a great deal o do with the mechanism of storms.

For this and other reasons the storan exhaustive investigation of the subject. What—it would like to know, to begin with—is a lightning flash? Whence does it come, and how is it generated? Do storm clouds serve as gigantic storage batteries? And does the electricity have anything to do with the making of rain?

Nobody can answer any of these ning flash has an extremely high voltage, with a low-amperage; in other words, that it contains only a small amount of electricity at high pressure. But there is no certainty about it.
The weather bureau man sends up

a scientific box kite with the help of a windlass, from a hill top, using plane wire in place of a string. Storm clouds come up and electricity begins to descend the wire, throwing off formidable sparks. It is interestingin-fact, it might even be dangerousbut it conveys no information.-Rene Bache, in The Circle.

WHY WOMEN ARE NERVOUS.

Austrian Surgeon Ascribes It to Incorrect Sitting Posture.

"No wonder your women are ner yous," remarked Dr. Joseph Garzouka, noted Austrian surgeon, to a news paper representative the other day. And he added: "Such positions as they assume while sitting is to my mind sufficient to underlyine their nerve

According to Dr. Garzouka the practice of crossing the knees, which he specially condemns, is peculiarly Amer-ican. He declares that in no country on the continent can young women be over the other, and he is astounded at the frevalence of the habit here.

In his home country, the physician-

who is touring the world in the interthings; they do not like rocking chairs. He notices that American women seem to like nothing but easy, lounging slouching down in them with their legs too much pressure on the spine.

Well-Named Smoky City. Pittsburg, the second city in size in Pennsylvania, which was named in nonor of the prime minister of Engand, after Fort Duquesne, built on spot by the French, had been captured by the English in 1758, derived the centered there. It is told in the old he passed through Pittsburg, sup posed that he had gone through a long tunnel in the Alleghenies. There was

Found Nail in His Skull. A remarkable discovery was made by the surgeons of Williamsburg hos-pital while they were operating on the from the elevated structure being erected across the Brooklyn plaza of the Williamsburg bridge. The surgeon came across a hard substance imbedded in the skull and a closer examination disclosed it to be the head of a nail. It proved to be a nail

more firmly than ever to the place.

fully three inches long, which had penetrated the brain.

The associates of Albright say he has had a remarkable career since he became an iron worker. He has had several 30 and 40 feet falls, and one 87-foot fall from a New Liverpool bridge. One time he fell 100 feet from a bridge in Pennsylvania into the water, and was nearly drowned before hauled ashere.

Unfortunate Comparison.
One of the most charming writers in

one of the most prominent newspaners, speaking of the hereditary but improving hig feet of American girls, ventures the prediction that it will be many years "before our girls come up to the standard of the Venus of Milo in that respect." It would be interesting to know what the standard of the Venus of Milo is in regard-to The original aculpture is in the Louvre, but it is sans hands and sans arms, and all attempts at the vandalism of "restoration" have been ost fortunately resisted.

Enlightened Eastern Potentate Of medium height, square shoulders, with the neatest of feet and pretty, shoes, faultlessly dressed in the lat-est fashion, with a keen eye, and possessing a charming manner and de-lightful-personality-which sets those in less exalted station at east, speak-ing English perfectly, but with a captivating accent, the king of Slam is one of the most intelligent and en-lightened of oriental potentates. His desire is to see his country progress, and for this reason his heir has been educated at Eton and the University

## SENIEL STATE

HAVE WE BEEN UNJUST TO KOREA!

By H. B. Hulbert. Former Adviser Emperor of Korea. Japan will bear watching. Those not intlmately and correctly informed as to the feeling in that country cannot appreciate the im-portance Japan attaches to itself. Japan is flushed with pride over her achieve

ients against Russia. She believes she can do anything. She doubts not an instant that the powers, even the United States, are afraid of her. She thinks she has accomplished in forty years in the way of civilization what it took us 1.000 years to achieve. Her vanity is fearful to

Napoleon Bonaparte was the personification of the present feeling in Japan. Like him, she took advantage of an enemy's weakness and was successful in it. Intoxicated by that early success, she firmly believes there is no limit to her power.

But it should be distinctly understood now that the time is coming when the powers will have to unite. as ther did against Napoleon to check Japan's rapacious er and give her her proper place among nations.

History will write this country's part in the spoila-ion of Kores by Japan in terms of which we will not be proud. There is no question that at Portsmouth Jstpan was offered a free hand in Koren in exchange the waiver of indemnity from Russia. This comes from Japanese sources.

DEVELOP HOME SPIRIT.

By Juliet V. Strauss. The individuality of the home is a thing in egard to which it pays to be selfish. There s a certain spirit that dwells in quiet rooms which, when once driven away, will never re turn. Too many strange faces will drive her way, too much absence will banish her.

Once you have lost her the sweet home nowhere in pleasures and palaces will you find her again. But she will haunt you and in the long years, when pleasure no longer allures, when ambition is dead, and the baubles of life for which you left her have vanished in thin air, you will see her mocking shadow, but never again feel her soft caress, as you used to know it in quiet days by the old home fireside.

No earthly pleasure is so genuine as home; yet it is a reproach in these days of false pleasures to be a ody." In this respect the people of old Virginia were he most enviable in the world. Though visiting was a matter-of daily occurrence, home was the passion of every

irginian's heart.

Home might be a tumbledown house, floors might be bare, and every evidence of departed glory eyes of the newcomer, but he never heard an apology for of any essential to comfort, nor an intimation that the home of his friend might be improved from worldly point of view. The hateur with which such a suggestion would have been received would have wilted the tuost aggressive advocate of pr

And truly when one sat at the fireside of these people and saw the self-satisfied countenances of the old folks at home and heard their intelligent converse, he was constrained to admire and envy the spirit of pride in which the Virginia gentleman's family believed in themin their home and their surroundings, and would not have changed them for a kingdom.

Let us, then, again suggest the exaltation of the in- succeed.

Ated-All Must Bear Label

dividual life, or perhaps it would be more frank to say the selfish life; for it is the belief of a very respectable minority that progress does not come by mass meetings, or societies, or organizations, but by homes, for which devoted and—yes—selfish families are contentedly work-ing. A home is about all that one woman can care for. One family is a fair amount of responsibility for one man. The more you mix outside interests with the interests of the home, the more you destroy domesticity. Home makes good soldiers, good lawmakers, good citizers. The vagrant life of those who merely cut and sleep at home, whose lives are full of petty social or political interests, is not calculated to insure a stable, sturdy race

of people in coming generations.

RURAL SCHOOL AS A SOCIAL CENTER By President K. L. Butterfield, Massachusetts Agricultural College.

The school must offer vocational training. This does not mean that every school shall be a trade-school. It does not even mean that the school shall aim specifically to teach trades. It does mean, however, that we will come to realize that the schools, in preparing the pupils for complete living, must bear in mind the fact that vocation is a large part of life,

Consequently vocational training in its broadest possible aspects must be one of the largest phases of school activity. This may not mean the introduction of ele mentary agriculture into all the rural schools, but it will mean the utilization of agricultural material in the training of the pupil, so that if he enters the agricultural vocation he will be adequately prepared for it.

The school must also develop the spirit of social or community service. I know of nothing better in this line than the plan-used-in-Maine of organizing school improvement leagues.

It is desirable giso for the school to become a social center, or at least one of the social-centers, of the neighborhood. The school ought to play a large part in the life of the mature people of the community; and it may well act as a rallying center for the educational interests of adults as well as of children.

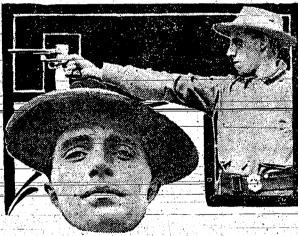

The school must definitely co-operate with other institutions of the community, such as the church, the grange, mprovement societies, fibrary, etc. In this connection should be frequent joint meetings of teachers and school patrons for the discussion both of school topics and\_of\_subjects\_of\_general\_community\_interest-

THE EDUCATED MAN WINS:

By King Edward VII. The competition in every branch of industry, especially in those branches which depend largely on science and art, is in these days se-

vere, and it must be met by increased application and improved methods. The world is, I believe, better for such competition, but it behooves individual nations to use every posthie effort to hold their own in the struggle. For this purpose higher education is an absolute necessity. However brilliant a man's natural talents may be, he is greatly hindered by the want of early training, and as a rule only those who have enjoyd a good education are capable of acquiring such p ciency in any branch of study as will enable them to

BEST RIFLE SHOT IN THE ARMY.

POLICEMAN C. J. L. SUNDBERG. SERGT, N. A. BERG. Signal honor has come to Sergeant N. A. Berg, company E; Second Washington infantry, of North-Yakima, Wash. Berg, after a brilliant contest, won-the President's match at the great national tournment, defeating the best military rifle shots in the United States. In addition, he got the best skirmish score in the President's match, taking seventh prize as well as first, in the aggregate. He is also a member of the team that won the national regimental skirmish match

Berg is a farmer and prefers bull's eye shooting to wild game hunting. He entered the national shoots three years ugo and made the first team from Washington his first year out. Berg will receive a handsome decoration and an autograph letter from President Roosevelt for his skill.

Policeman C. J. L. Stindberg, of Jamestown, N. Y., set a new world's record with a police revolver, scoring 4,600 out of a possible 5,000 at 50 yards.

EVERYTHING FRESH. -----

critics ask how it will be possible to label ripe tomatoes without lenderson's Handy Hen's Nest, but it know when I might have quashing them. Matrimony makes a man awfully

SECRET OF CONTENTED LIFE.

By Rev. Olin Scott Rocke I have learned, in whatsoever state am, therewith to be content.—Philipplans 4:11.

When St. Paul wrote these philo sophic words he was in prison, depend ent upon the charity of others and in peril of a violent death. He recom mends "content" because it sliences murmuring against the Supreme Be ng and destroys jealousy toward our fellows. It gives serenity to the mind nobility to the life and peace to the heart.

apostle's other writings prove that he recognized that there is spurious as well as a genuine content There is such a thing as righteous dis content, and it is absolutely necessary to all advancement, whether moral, so cial, intellectual or spiritual. St. Paul is speaking of physical wants and comforts, and not of moral or spiritua His great endeavor was to make men dissatisfied with their spir tual state; he was constantly urging them onward and upward.

on the other hand, he teaches that there should be no anxiety about temporal things -- Man is to do his utmost but, having done so, is not to worry. Character is the main thing, and whatever develops that is impor tant, even if we are denied worldly success.

Then if you would be happy, strive to enrich the soul seek supremely heavenly wealth; with regard to the body, it is well to accept what Providence orders.

There are two good rules which may help somewhat toward the attainmen of content. First curb the imagina tion from dwelling sadly on things do not possess. Many make their lives wretched and lose all interest in what they have by thinking constantly of what they have not. Whether it be wealth, position, fame or power, the one thing locking is the one thing without which they cannot be happy. In our day the great cause for discontent secias to be that everyone is not a mil blionaire, and that, too, without special labor. Surely it is fortunate that we cannot all have our desire, else there would be no stimulus to effort and the world's work could not be done.

other rule is to cultivate habit of looking on the bright side of There is no cloud without it. silver liping-no night without 163 star Disappointments but his is a weak nature that is over come by them. They are necessary to strength. Despondency checks exertion, but good spirits may achieve much

God has given each one of us much to enjoy if we have eves to see it. Flowers, the songs of birds and all the beauties of nature are typical of goodness. Princely pos-

chase little more to food a corai-ment and shalter, and if we possess, these we ought not to be discontented. Let-us look on the bright side of things. .

Such rules will go far toward im parting the great virtue of content; but to be thoroughly efficielous they must be founded upon that vital principle fect confidence in God's love and pro-

MEETING TEMPTATIONS By Rev. Henry F. Cope

Be not overcome of evil, but overrome evil with good .- Romans 12:21 There are few who would not rather do good than evil, few who do not do sire the right way of living; but difficulty is in summoning the will to walk therein; the problem is not that of determining the right, but that of reaching and realizing it. He makes a great mistake who falls to credit mankind with desires for righteousness.

But how soon and easily are we di

couraged. When we would do good we find evil so often present and in such power that at last, becoming conthat insuperable difficulties lie in the path of virtue, it does not seem while to attempt to tread it. The weak-willed are thus buffled before they really begin.

Others struggle on, seeking freedom from sin by stern self-denial, by rigidrexcluding from their lives all the lon ist of things that experience or opinion has pronounced dangerous or evil is given to effort for negative righteousness. But it may well be questioned whether either the individual or the race is ever substantially the better-for-negative-righteensness

The path to the heights where may ought to tread is not indicated by "Don't" signs only. The significant mistakes we make in our light against sin is that we put ourselves solely on the defensive, imagining that the only thing we possibly can do is to hold the fort against our foes. But the fensive has everything to lose in defenand nothing to gain by victory. Temp tation must be assalled.

Virtue is not something preserved; is something attained: It is not the maintaining of ourselve as we are, but the mounting to what we ought to be. The life that move on to larger and better being misses the nasaults of many otherwise dam aging temptations, for it simply sweeps before it.

A man never overconies evil until he learns to loathe it and to deny its right to any place in his life. Autipathy to the base and unworthy is developed in proportion as the appetite for the good and Morthy grows. Morality is largeability to distinguish between the which is elevating and that which is degrading, and the cultivation of the desire for the things helpful.

You are not likely to overroun while you are entertaining it in your henet. The sins ngainst which we are helpless are the ones to which we are

to reach any worthy ideal by simply emptying the heart of all things evil. What we need is not so much larger number of active, aggressive vir tues to occupy our energies. He is good who is positively good for some thing, not be who is innocent of any thing. What you really are can never be determined by the most minute enu-meration of what you are not. There are too many whose sole conscious vig

tue lies in what they are not. Cultivate the virtues and the vices will take care of themselves. The Abvelopment of the good is the death of There is never an hour nor a circumstance of life, never so much as a chance passer on the street or a flower by the wayside, but that in then we find either good or ill the thought and optency that helps or hinders.

He who fares forth in cheerfulnes of heart, seeking to find good and to do good, discovers that the foes he once feared flee before him; some of the temptations turn out to be illusions. and obstacles once mountain high sink to the plain. Step out daily for better happier things, and the base and evil will have decreasing power and attraction for you.

Health is not in shutting out disease. but in crowding in vigor, sunshine, cheer and strength. Health of the heart comes in the same way. Cease to think of sin; seek the good and true the things kindly and helpful, the thoughts fair and wholesome; set in the heart the ideal of the best of all ing to serve God and love man, and life shall find the vigor of virtue.

"What's the matter? Isn't it a good healthy animal?" . "It's too healthy. I expected it to hospitable. But neither is one likely die long ago."—Philadelphia Press.

Scarlet fever is an eruptive disease attacking persons of any age, but usually children, since, owing to its wide contagions prevalence and exceedingly character, few persons attain adult life without having been exposed to it. For this reason it is classed among the diseases of childhood.

It is the most serious of all the or-dinary children's diseases, for, in adto the direct mortality, which ditto varies in different epidemics between two and thirty per cent of those at tacked, it is prone to leave behind an acute or chronic disease of the kid neys, or an inflammation of the ears

which may cause permanent deafness.
It is exceedingly contagious at all stages, from the very beginning until the last bit of skin has peeled off. This contagion is carried in the discharges from the nose and throat, and bits of skin thrown off in the final stages of desquamation, or "peeling; and it is very long-lived, persisting ometimes for months in handkerchiefs bedding, clothing, and even the toys of the sufferer.

A scarlet fever patient should be treated in a room without carpets, win low hangings or upholstery—indeed the room should be bare of all furni ture, even books, except what is absolutely necessary. No one, except the nurses in pharge and the doctor, should ever the permitted to enter the room, which should be in the upper story, and as far away as circumstances will permit. from the living-rooms of the rest of the family.

The room should be always thoroughventilated-through the windows, the door being kept closed. Once a day the floor, walls and furniture should be wiped with a damp cloth wrung out in an antisceptic solution. No utensils should be carried from the room. The discharges, after having been mixed with a powerful antiseptic and allowed to stand an hour, should be transferred to another vessel outside the ick-room and immediately emptied into the sewer or cesspool

Food brought to the sick-room should be transferred at the door to special dishes used only by the patient and nurses, and all waste food should be thrown into a vessel containing a disinfectant, or, better, burned, if there is a stove in the room.

All soiled linen should be sonked for several hours or boiled before being taken away, and should not be mixed the family wash

Ocean Rate War Spreads The International Mercantile Marine Company has gone into the rate war by id charge to \$2 to meet the action of competitors." This is virtually the winter schedule months ahead of season.

"Nothing succeeds like success," is an old and true saying, having many applications in Western Canada. The following letter is an illustration. The writer, Mr. Gerts, left Chicago a short ime ago and the success he has achieved may well be gained by anyone hav-ing pluck and energy by locating on free homestead lands in Western Canada. A change has recently been made in the Canadian Land Regula tions concerning homestends, which makes it possible for any member of a family to make entry for any other member of the family entitled to a homestead. For instance, a man may now make entry before the local agent for his father or for his brother or brothers, or for his son or sons, or for a sister or daughter who may be the head of the family having minor children depending upon her for support. dster, daughter or mother are also entitled to make entry for any members of the family who are permitted entry upon a homestead. The only fee required is \$10 for each entry. A great saving in railway expenses is thus

Battleford, Sask., Aug. 4, 1907. Dear Sir: Thinking a letter from us-Northwest settlers might interest you I write a few lines to let you know we are progressing finely and well pleased with our new hor

made. Read what Mr. Gerts has to

When I think of the many hard-working, industrious men East with families who are struggling for a living and doing the strenuous, laying up practically nothing for old age, and the thousands of acres of land-here vet to be plowed and cultivated, capable of raising sixty to eighty bushels of onts, thirty to for ty bushels of wheat, it certainly seems a pity the two cannot be brought to gether. But I will repeat, this country- is only for the industrious and thrifty; also I might add it requires some capital to start.

A man should have at least a team of three good horses; better to have mares, so as to have some colts coming along each year ... It is hest to hring them with him, as good work horses are high. He should be able to purchase plow, disc and drag, harrow, drill, binder, mower and hay rake. Of course several taking up claims or buy-ing land near together can divide up purchasing of the above machinery and exchange work. This plan will work well for a few years or until crops will warrant each individual to purchase a full outfit.

We have 480 acres of as good farm land as lies in the famous Cut Knife district. Every foot can be plowed. Last year our outs run sixty bushels re. I sold them for 50 cents per bushel on the place.

seeding owing to the late spring. Last when I hegan using Doan's Kidney country by the oldest settlers (some Pills in 1001, but the remedy cured me, who have been here thirty-five years), but with a comfortable house and plenty of fire-wood, which we hauled four miles, we passed the winter quite pleas-The air is clear and dry. Some of the days I came from work I was surprised to find the thermometer registering 40 degrees below zero. Though we never keep fire at night, we had

nothing freeze in our cellar.

Our stock and chickens wintered fine. I have a yearling heifer, who would hold her own in any "fat stock show." She has never had a drop of milk since she was four months old and has never had a mouthful of grain. A gentleman who saw her made the remark "he bet that helfer had eaten her head off with grain," but would hardly believe she had never had any grain-

This is a great country for growing all-kinds of vegetables, and we are certainly enjoying our garden. The flavor of the green peas is especially fine. Last seeson Mrs G conned a lot of them. and we have enjoyed them up to the fresh crop.

I am sorry I did not have time this past season to attend to transplanting trees, but will keep the land I had pre pared worked up for next season's planting. I received a number of small trees (ash and maple) from the Government Experimental Farm at Indian Hend. I put them around the edge of the garden and they are doing fine. I also received quite a lot of other seeds, oats, wheat, potatoes and rhubarb roots.

The experience of Capt. John L. Ely-

of Co. E. 17th Ohi

East 2d street, Newton, Kansas, will daterest the thousands of veterans who came back from the Civil War suffering tortures with kidney complaint, Capt. Ely says: "I contracted kidney-trouble during the Civil War, and the occasional attacks finally eveloped into a chronic case. At one

developed into a chronic case. At one time I had to use a crutch and cane to The indications are for a good crop
this year, though we were very late in was a distressing retention of the kidand I have been well ever since." Sold by all dealers, 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

BOY HAS SIXTH SENSE.

Norwegian Lad Can Find Missing People Through Mysterious Power. A mysterious sixth sense which enables him to find missing persons is the power which is making John Floetum the 14 year old son of a small farmer, an object of curiosity and awe throughout Norway.

One of his most remarkable successes

rded by the Afternosten to have of Glommen left home and could not be found. A search party of seventy men organized by the family scoured the surrounding country, without finding any trace of the farmer. Then-itwas decided to appeal to young Floet-

The youth was shown a photograph cating a route through the district, which he stated the farmer had taken. Scores of the villagers then set out and followed the plan, at the end of which, near a narrow river, the missing man's handkerchief was found for the Missouri Pacific railroad feets. of the missing man, and immediately proceeded to draw a rough plan, indiing man's handkerchief was found, but no trace of the man himself was visi-

On the following day the boy led the search party. He entered a boat, which was salled along the river ac cording to his orders. He sat in the stern with a vacant stare, apparently oblivious to his surroundings.

Suddenly lie sprang to his feet, ery-ing: "Here he lies." The water was dragged and the body

The toy is credited with dozens of similar remarkable feats, and crowds of people are traveling from all parts the country-to-se

## FOUND OUT.

A Trained Norse Made Discovery. No one is in better position to know the value-of-food-and-drink-than-a trained nurse.

trained nurse.

Speaking of coffee, a nurse of Wilkes
Barre, Pan, writes: "I used to drink
strong coffee myself, and suffered
greatly from headaches and indigestion. While on a visit to my brothers I had a good chance to try Postum Food Coffee, for they drank it altogether in place of ordinary coffee. In two weeks after using Postum I found I was much benefited and finally my headaches disappeared and also the in-

digestion.
"Naturally I have since used Postum among my patients, and have noticed a marked benefit where coffee has been

left off and Postum used. "I observed a curious fact about Postum when used among mothers. It greatly helps the flow of milk in cases where coffee is inclined to dry it up, and where tea causes nervousness.
"I find trouble in getting servants to make Postum properly. They most

always serve it before it has been boiled long enough. It should be boiled 15 to 20 minutes after boiling begins and Read to Wellville, in page. There's

WELLMAN POLAR TRIP FAILS

Airship Is Wrecked and Plan to Seek Pole Abandoned for This Year. Walter Wellman on Friday arrived at Tromsoe, Norway, on board the Frithjof from Spitzbergen on his way home. He announced that he had definitely abandoned for this year, after a disastrous trial of his airship, the proposed attempt to reach the North Pole World-wide interest had been excit

ed in Wellman's proposed trip. Wellman's plans were as simple as they were spectacular and scientific. With two-picked-companions be purposed to sail in his airship from to the North Pole, a distance as the an independent life. What more can crow files of 018 miles.

The airship was a dirigible balloon modeled on the best lines known to French balloon makers. It bore a stee car 115 feet long, which would contain the three explorers, their outfit of meand a kennel of twenty-nine Alaskan Respectfully yours, Chas, M. Gerts sledge dogs with sledges. In case of

WALTER WELLMAN.

mishap to the airship or unfavorable winds, the men purposed to abandon mately nine-tenths of the sea-coast guns the America and take to the sledges for the remainder of the way.

With winds in their fayor and the airship standing the strain well they ligured-that-the-trip-to-the-pole-could be made in three days. With ordinary delays, but still sticking to the airship, it might take them twenty days. Forced to almadon the America, their Ohio, new Hying at 500° Forced to alundon the America, their East 2d street, New trip might last three months. They ton, Kansas, will inter-had provisions for 275 days.

Starting from Spitzbergen, they figured that they would have to travel 1,236 sea miles to the pole and back to their base; to the pole and thence to Alaska, the trib would cover 1.750 Northern Norway, 1,740 miles; to the pole and thence to Northern Siberia, an average of 1,500 miles; to the pole and thence as far south as human habitations in Canada, 2,440 miles.

The airship made an ascent Sept. 2

in a strong northeasterly-wind-which trove it southeastward over the land It was found necessary to cut the baln adrift from the other parts of the alfship, but it was recovered after two

INCREASE FARMERS' EARNINGS Big Gain for Year Due to Higher

Prices of Products. ops, published in the American Agricul urist, the American farmers' carnings are \$1,000,000,000 greater this year than last production in general will be fully 10 per cent-less in quantity than in 1900, which "The farmer was never in so health

position as he is to-day-financially, sodally, politically, mentally and spirituilly," says the report. "The increase in the value of his real estate has been pro-digious. He owes less money than ever before. He has greater assets than ever. Again, the farmer's wants are greater. He is in the market for more and better breeding stock, farm implements, houses hold goods and other merchandise."

BIG GUNS ON DEFENSE. ncle Sam Has Enormous Rifles to

Guard Shore Line.

Despite the fact that the United States has one of the longest coast; lines of any great power it will shortly afford that coast line ample protection from one end to the other on

both the Atlantic and Pacific sides. Work will soon be begun to put on the finishing touches of de-fenses and fortifications in the insular possessions. Altogether the outlay neces sary to fortify and protect the United States proper and its outlying possessions is over \$200,000,000, of which amount considerably more than balf has been expended.

The scheme of national defense upor

which work was in progress between 1888 and 1906 was based primarily upon a report submitted to the President by the so-called Endicott board in 1886. board investigated the entire continental coast line of the United States and recconst line of the United States and recommended the construction of fortifications which were estimated to cost about \$126,000,000. Along the lines mapped out by this board Congress has appropriated approximately \$75,000,000.

In 1905 the President again appointed

board to revise the work done under the Endicott board and this time Secre-tary Taft was its president. After an exhaustive investigation the new national const defense board-recommended an additional expenditure of \$51,000,000 to provide fortifications for new places and to modernize the defenses already built on the recommendation of the Endicott

As a result of the work of both boards the following twenty-six ports may be said to be provided with ample sea coast defenses; Kennebee river, Me.; Portland, Me.; Portsmouth, N. II.; Boston, Mass.; New Bedford, Mass.; Narragansett Bay, R. I.; eastern entrance to Long Island sound; New York, N. Y.; Delaware river; Baltimore, Md.; Washington, D. C.; Hampton Roads, Va. Cape Fear river, N. C.; Charleston, S. C., Port Royal, S. N. C.; Characston, S. C.; Fore toyan, S. C.; Savannath, Ga.; Key West, Fla.; Tampa bay, Fla.; Pénsacola, Fla.; Mubile bay, Ala.; New Orleans, La.; Galston, Canaly, San Diego, Cal.; San Francisco, Cal.; Columbia river, Oregon and Washington: Puget sound, Wash.
A glance at the list shows twentytwo of the twenty-six sea-coast defenses
on the Atlantic coast, mounting approxi-

### HAVE WE REEN UNJUST TO KOREA!

By H. B. Hulbert, Former Adviser Emperor of Korea. Japan will bear watching. Those not inti-mately and correctly informed as to the feeling in that country cannot appreciate the importance Japan attaches to itself. Japan is flushed with pride over her achieve

nents against Russia. She believes she can do anything. She doubts not an instant that the ther powers, even the United States, are afraid of her. She thinks she has accomplished in forty years in the way of civilization what it took us 1.000 years to achieve. Her vanity is fearful to Napoleon Bonaparte was the personifications of the

present feeling in Japan. Like him, she took advantage of an enemy's weakness and was successful in it. Intoxicated by that early success, she firmly helieves there is n limit to her power.

But it should be distinctly understood now that the time is coming when the powers will have to unite, as, they did against Napoleon, to check Japan's rapacious er and give her her proper place among nations.

History will write this country's part in the spoila-tion of Kores by Japan in terms of which we will not be proud. There is no question that at Portsmouth Japan was offered a free hand in Korea in exchange for the waiver of indemnity from Russia. This comes from Japanese sources.

By Juliet V. Strauss.

#### DEVELOP HOME SPIRIT.

. The individuality of the home is a thing in regard to which it pays to be selfish. There is a certain spirit that dwells in quiet rooms when once driven away, will neverturn. Too many strange faces will drive her away, too much absence will banish her. Once you have lost her the sweet home spirit—nowhere in pleasures and palaces will you find her again. But she will havet you, long years, when pleasure no longer allures and in the when ambition is dead, and the baubles of life for which you left her have vanished in thin air, you will see her mocking shadow, but never-again-feel her-soft caress, as you used to know it in quiet days by the old home fire

No earthly pleasure is so genuine as home; yet it is a reproach in these days of false pleasures to be a "home dy." In this respect the people of old Virginia were the most enviable in the world. Though visiting was a matter of daily occurrence, home was the passion of every Virginian's heart.

Home might be a tumbledown house, floors might be bare, and every evidence of departed glory greet the eyes of the newcomer, but he never heard an apology for the absence of any essential to comfort, nor an intimation that the home of his friend might be improved from a worldly point of view. The hateur with which such : suggestion would have been received would have wilted the most aggressive advocate of progress.

And truly when one sat at the fireside of these people and saw the self-satisfied countenances of the old folks at home and heard their intelligent converse, he was constrained to admire and envy the spirit of pride in which the Virginia gentleman's family believed in them selves, in their home and their surroundings, and would not have changed them for a kingdom

Let us, then, again suggest the exaltation of the in-

duties.

dividual life, or perhaps it would be more frank to say the selfish life; for it is the belief of a very respectable minority that progress does not come by mass meetings, or societies, or organizations, but by homes, for which devoted and—yes,—selfish fimillies are contentedly work-ing. A home is about all that one woman can care for. levoted and-ye One family is a fair amount of responsibility for one man. The more you mix outside interests with the interests of the home, the more you destroy domesticity. Home makes good soldiers, good lawmakers, good citizens. The yagrant life of those who merely eat-and sleep whose lives are full of petty social or political interests, is not calculated to insure a stable, sturdy race of people in coming generations.

### RURAL SCHOOL AS A SOCIAL CENTER

By President K. L. Butterfield, Massachusetts Agricultural College.

The school must offer vocational training. This does not mean that every school shall be It does not even mean that the school shall aim specifically to teach trades. It does mean, however, that we will come to realize that the schools, in preparing the pupils for complete living, must hear in mind the fact that vocation is a large part of life. \*

Consequently vocational training in its broadest possis. ble aspects must be one of the largest phases of school activity. This may not mean the introduction of ele mentary agriculture into all the rural schools, but it will mean the utilization of agricultural material in the training of the pupil, so that if he enters the agricultural vocation he will be adequately prepared for it.

The school must also develop the spirit of social of ommunity service. I know of nothing better in this line than the plan used in Maine of organizing school im-

It is desirable also for the school to become a social center, or at least one of the social centers, of the neighborhood. The school ought to play a large part in the life of the mature people of the community; and it may well act as a rallying center for the educational interests of adults as well as of children.

The school must definitely co-operate with other insti-tutions of the community, such as the church, the grange, improvement societies, library, etc. In this connection there should be frequent joint meetings of teachers and school patrons for the discussion both of school topics and of subjects of general community interest.

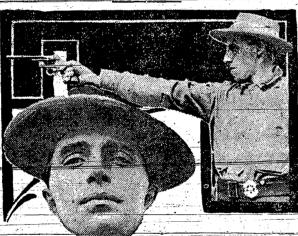

#### THE EDUCATED MAN WINS.

By King Edward VII.

The competition in every branch of indus try, especially in those branches which depend largely on science and art, is in these days severe, and it must be met by increased application and improved methods. The world is, I believe, better for such competition, but it beliooves\_individual\_nations\_to use every possible-effort-to-hold-their-own-in-the-struggle. For-this-purpose-higher-education-is-an-absolute necessity. However brilliant a man's natural tal-

ents may be, he is greatly hindered by the want of early training, and as a rule only those who have enjoyed a good education-are capable of acquiring such proficiency in any branch of study as will enable them to

BEST RIFLE SHOT IN THE ARMY.

### EVERYTHING FRESH. -----

Thereupon critics ask how it will be Nothing ever daunted the agent for nossible to label ripe tomatoes without Henderson's Handy Hen's Nest but it know when I might have another quashing them. Others say it will not was unusual for him to meet with such chance, folks round hore not being, as better for negative rightcoursness. do merely to label pea pods, but that a genial welcome as was bestowed on a rule, in quite such a hurry as rou. separate pea must receive its cerhim by Mr. Eben Saunders when he was wakened, from his afternoon doze on the plazza by a loud cough, create work for the unemployed. Then

The cough was close to his ear, but as soon as it had done its work the agent for Henderson's Handy Hen's Nest-seated\_himself\_in\_a\_comfortable rocking-chair at a little distance from done the question of keeping them from working overtime and the matter of his victim.

"Fine day!" he said in a loud tone surprised at the slow smile which oversprend the face of his host Napoleon must have been right unction. "I never saw a better."

efter all. We are a nation of shop-"Never knew anything much fresher than the air you get up on this hill," continued the agent, as he swung one of the Handy Hen's Nests into view. "We got most every fresh up here," said Mr. Saunders, tranquilly. "Now from Mr. Plerpont Morgan, Shak- there's paint-what's on that chair you plumped down into in such a hurry. isn't more than three hours old, if it's that. You'd 've noticed it if you hadn't in considable baste, but I wouldn't try to get out of it too quick, young man, you're liable to tear your

any foreign nation that has the taste and money to buy them. We can put "Twould be better," said Mr. Sauna up as coolly as Charles Surface ders, mildly, as the agent for Henderson's Handy Hen's Nest at last dotached himself from the rocking-chair, not to be in quite such a hurry next for trouble unless he is strenuous time. But seeing you were, I can give ever after,

clothes.

young man left here one day that he list of things that experience or opinion told mother and me would remove fresh has pronounced dangerous or evil. Life told mother and me would remove fresh has pronounced dangerous or evil. Life paint and leave the goods. Mother and I've never had occasion to try it, but I should like to see it work, and I don't appeared to be."

Earth Wobbling at Its Poles

stantly shifting its position, are facts vestigations now being made in various parts of the world." So writes John Elfrath Walkins in the Technical data to such a conclusion have been the Naval Observatory, Washington. For research along the same lines there the earth-a chain of stations located at Galthersburg, Maryland, Clacianati, leatus to loathe it and to deny its right Japan; Tschardjul, Turkestan; and Sharloforte, Italy. In each of this series of observatories is mounted a 'zenith telescope' used for timing the passage of stars across the great arch of the heavens. At the Naval Observatory the research is conducted by aid of a 'prime vertical transit,' the only one in use in the Western Hemis phere."

Matrimony makes a' man awfull restless a little while before and fer

SECRET OF CONTENTED LIFE.

By Rev. Olin Scott Roche I have learned, in whatsoever state I am, therewith to be content.-Philip plans 4:11.

When St. Paul wrote these philo sophic words be was in prison, depend-ent upon the charity of others and in peril of a violent death. He recom "content" because it silences murmuring against the Supreme Be ing and destroys jealousy toward out fellows. It gives serenity to the mind, nobility to the life and peace to the

heart. The apostle's other writings prove that he recognized that there is spurious as well as a genuine content There is such a thing as righteous dis content, and it is absolutely necessary to all advancement, whether moral, so cial, intellectual or spiritual. St. Paul is speaking of physical wants and comforts, and not of moral or spiritual His great endeavor was to make men dissatisfied with their spir-Itual state; he was constantly urging them onward and upward.

But, on the other hand, he teacher that there should be no anxiety about temporal things. Man is to do his ut most, but, having done so, is not to worry. Character is the main thing, and whatever develops that is impor tant, even if we are dealed worldly Buccess.

Then if you would be happy, striv to enrich the soul-seek supremely eavenly wealth with regard to the body, it is well to-accept what Provi-

There are two good rules which may nelp somewhat toward the attainmen of content. First, curb the imagina tion from dwelling sadly on things do not possess. Many make their lives wretched and lose all interest in what they have by thinking constantly of what they have not. Whether it be wealth position, fame or power the out thing lacking is the one thing without which they cannot be happy. In our day the great cause for disconten seems to be that everyone is not a mil lionaire, and that, too, without special labor. Surely it is fortunate that we cannot all have our desire, else there would be no stimulus to effort and the world's work could not be done cther rule is to cultivate the

limbit of looking on the bright side of There is no\_cloud\_without-its allver lining-no night without 153 star. Disappointments come to everybody, but his is a weak nature that is over come by them. They are necessary to keen down pride and to increas strength. Despondency checks exertion but-good spirits may achieve much-God has given each one of us much

to enjoy if we have eyes to see it. Flowers, the songs of birds and all the beauties of nature are typical-of-IIIs goodness. Princely possessions-can-purchase little more than food and rai-ment and shelter, and if we possess these we ought not to be discontented. Let us look on the bright side of things.

Such rules will-go far-toward im parting the great virtue of content, but be thoroughly efficacious they mus be founded upon that vital principle which actuated St. Paul, namely, a perfect confidence in God's love and pro-

#### MEETING TEMPTATIONS. By Rev. Henry F. Cone

Be not overcome of evil, but overcome evil with good Romans 12:21.

There are few who would not rather lo\_good\_than\_evil,-few\_who-do\_not\_desire the right way of living ; but our difficulty is in summoning the will to walk therein; the problem is not that of determining the right, but that of reaching and realizing it. He makes a great mistake who falls to-credit man. New Battle Shins of the Breadmonght path of virtue, it does not seem worth while to attempt to trend it. The wenk-willed are thus builled before they really begin.

Others struggle on, seeking-freedom from sin by stern self-denial, by rigidrexcluding from their lives all the long righteousness. But It may questioned whether either the individual or the race is ever substantially the

The path to the heights where mat ought to trend is not indicated by Don't" signs only. The significant mistakes we make in our fight against "That this great spinning top on sin is that we put ourselves solely on which we dwell is wobbling upon the the defensive imagining that the only axis and that the North Pole is con thing we possibly can do is to hold the fort against our focs. But the deproved by an elaborate series of in. fensive has everything to lose in defeat and nothing to gain by victory. Temp-So writes tation innet be assailed.

Virtue is not something preserved: 1 World Magazine, "The longest series is something attained; it is victory. of systematic observations contributing It is not the maintaining of ourselve data to such a conclusion have been as we are, but the mounting to what made ceaselessly since July, 1903, at we ought to he. The life that moves on to larger and better being misses the assaults of many otherwise dam has more lately been established about aging temptations, for it simply sweeps them before it.

> to any place in his life. Antipathy to the base and unworthy is developed in proportion as the appetite for the good. and worthy grows. Morality is large-ly-a matter of good taste—that is, the ability to distinguish between that which is elevating and that which is degrading, and the cultivation of the desire for the things helpful.

You are not likely to overcome evil while you are entertaining it in your heart. The sins against which we are belpless are the ones to which we are

to reach any worthy ideal by simply mptyling the heart of all things evil What we need is not so much mailer number of vices to lament as larger number of active, aggressive virto occupy our energies. He is good who is positively good for some thing, not he who is innocent of anybe determined by the most minute enu-meration of what you are not. There are too many whose sole conscious vir-tue lies in what they are not.

Cultivate the virtues and the vices will take care of themselves. The development of the good is the death of the bad. There is never an hour nor a circumstance of life, never so much as a chance passer on the street or a flower by the wayside, but that in them we find either good or ill the thought and optency that being or hinders.

He who fares forth in cheerfulness of heart, seeking to find good and to do good, discovers that the foes he once feared flee before him; some of the temptations turn out to be illusions, and obstacles once mountain high sink to the plain. Step out daily for better happier things, and the base and eyil will have decreasing power and attract tion for you.

Health is not in shutting out disease but in crowding in vigor, sunshine, cheer and strength. Health of the heart comes in the same way. Cease to think of sin; seek the good and true, the things kindly and helpful, the thoughts fair and wholesome; set in the heart the ideal of the best of all lives, the life that subdued sin by s ing to serve God and love man, and life shall find the vigor of virtue

## Avoiding Scarlet Fever.

Scarlet fever is an eruptive disease, attacking persons of any age, but usually children, since, owing to its wide prevalence and exceedingly-contagious character, few persons attain adult life without having been exposed to it. For this reason it is classed among the diseases of childhood.

It is the most serious of all the ordinary children's diseases, for, in addition to the direct mortality, which varies in different epidemics between two and thirty per cent of those at-tacked, it is prene to leave behind an acute or chronic disease of the kidneys, or an inflammation of the enrs which may cause permanent deafness.

It is exceedingly contagious at all stages, from the very beginning until the last bit of skin has peeled off. contagion is carried in the discharges from the nose and throat, and in the bits of skin thrown off in the final stages of desquamation, or "peeling; and it is very long-lived, persisting sometimes for months in handkerchiefs, bedding, clothing, and even the toys of the sufferer.

A scarlet fever patient should be treated in a room without carpets, winlow, hangings or unholstery—indeed. the room should be bare of all furni ture, even books, except what is absolutely necessary. No one, except the nurses in charge and the doctor, should ever be permitted to enter the room which should be in the upper story, and as far away as circumstances will permit from the living-rooms of the rest of the family.

The room should be always thoroughventilated—through the windows, the door being kept closed. Once a day the floor, walls and furniture should be wiped with a damp cloth wrung out n an antisceptic solution. No utensils should be carried from the room. The discharges, after having been mixed with a powerful antiseptic and allow ed to stand an hour, should be trans ferred to another vessel outside the sick-room and immediately emptied into the sewer or cesspool.

'Food brought to the sick-room should be transferred at the door to special s used only by the patient and nurses, and all waste food should be thrown-into a vessel containing a disinfectant, or, better, burned, if there a stove in the room.

All soiled linen should be sonked for everal hours or boiled before being taken away, and should not be mixed with the family wash.

Nurses leaving the room for neces-ary air and exercise should change the outer garments-outside the door and should avoid meeting or talking with any one outside the sick-room. Couth's Companion.

## SERMON IN ESPERANTO

Unusual Scene at Congress Held in Cambridge, England, The esperanto congress held in Cam-England, recently, brought together 1.300 representatives of more than twenty nations, was the occasion of a sight which the world and never-witnessed before. This was are set up on the theory that people the preaching of a sermon and the coning of the entire Church of England service in esperanto, the universal anguage. These devotional exercises were held-at Great-St. Mary's the uni versity church.

The preacher was Rev. J. Cyprian Rust, who had translated into esperanto all the hymns that were used The scene was truly impressive. Here was an Englishman talking in a lan-

Ocean Rate War Spreads The International Mercantile Marine Company has gone into the rate war by cutting its east-hound charge to \$22.50. "to meet the action of competitors." This is virtually the winterschedule two months ahead of season.

Illinois Man Writes Regarding His Success in Western Cauada— Change in Homestead Regulations Make Entry Easily Accomplished. "Nothing succeeds tike success," is an old and true saying, having many applications in Western Canada. following letter is an illustration. The writer, Mr. Gerts, left Chicago a short time ago and the success he has achieved may well be gained by anyone having pluck and energy by locating on the free homestend lands in Western Canada. A change has recently been made in the Canadian Land Regulations concerning homesteads; which makes it possible for any member of a family to make entry for any member of the family entitled to a homestead. For instance, a man may now make entry before the local agentfor his father or for his brother or brothers, or for his son or sons, or for sister or daughter who may be the head of the family having minor children depending upon her for support. A sister, daughter or mother are also entitled to make entry for any nighbers of the family who are permitted entry upon a homestead. The only fee required is \$10 for each entry. A great

Battleford, Sask., Aug. 4, 1907. Dear Sir: Thinking a letter from us Northwest settlers might interest you, write a few lines to let you know we are, progressing finely, and well-pleased with our new home.

saving in railway expenses is thus made. Read what Mr. Gerts has to

When I think of the many hard-working, industrious men East with families good for men to be with men only and who are struggling for a living and doing the stronuous, laying up practically now and then, and the club-is-essennothing for old age, and the thousands of acres of hand here yet to be plowed and cultivated, capable of raising sixty to eighty bushels of onts thirty to for ty bushels of wheat, it certainly seems a pity the two cannot be brought together. But I will repeat, this country is only for the industrious and industrious and thrifty; also I might add it requires ome capital to start. A man should have at least a tenm of

three good horses; better to have mares, so as to have some colts coming along each year. It is best to bring them with him, as good work horses are high. He should be able to purchase plow, disc and drag, harrow, drill, binder, mower and hay rake. Of course several taking up claims or buy ing land near together can divide up the purchasing of the above machinery and exchange work. This plan will work well for a few years or until crops will warrant each individual to

purchase a full outfit. We have 480 acres of as good farm land as lies in the famous Cut Knife district. Every foot can be plowed. Last year our oats run sixty bushels per acre. I sold them for 50 cents per bushel on the place.

whiter was the coldest known in this country by the oldest settlers (some who have been here thirty-five years). but with a comfortable house and plenty of fire-wood, which we hauled four miles, we passed the winter quite pleasantly. The air is clear and dry. - Some the days I came from work, I was surprised to find the thermometer reg istering 40 degrees below zero. Though we never keep fire at night, we had nothing freeze in our cellar.

Our stock and chickens wintered

I have a yearling beifer, who would hold her own in any "fat stock how." She has never had a drop of milk since she was four months old and has never had a mouthful of grain. A gentleman who saw her made the re-"he bet that helfer had eaten her head off with grain," but would hardly believe she had never had any grain.

This is a great country for growing all kinds of vegetables, and we are certainly enjoying our garden. The flavor of the green peas is especially fine. Last season Mrs. G. canned a lot of them, we have enjoyed them up to the fresh crop.

I am sorry I did not have time this past season to attend to transplanting Scores of the villagers then set out pared worked up for next season's planting. I received a number of small ing man's handkerchief was found, but trees (ash and maple) from the Government Experimental Farm at Indian Congress, and Head. I put them around the edge of the garden and they are doing fine. I ernment Experimental Farm at Indian Head. I put them around the edge of the garden and they are doing fine. I also received quite a lot of other seeds. wheat, potatoes and rhubarb roots,

which were acceptable.

It is uscless for us to bother with garden flowers, as wild ones grow in profusion. We are located near a fine creek, the water of which is soft and fine for bathing and washing. We have a well of water near the house, 82-feet-deep-and-21-feet-of-water-all the time, though it is harder than the

Land which could be bought for five dollars per acre three years ago, is now worth \$14 per acre, and steadily advancing each year.

All kinds of improvements are going

on. Steam-plows and large threshing outfits are already in. Roads are being graded, bridges being built across rivers and creeks. Last year I took my family, also wagon across the Saskatchewan River in a row boat, swam my team across, and now the contract has been let for a \$200,000 bridge at that

The C: N. R. have run their final survey from Battleford to Calgary, running west about one mile north of us. The C. P. R. have run-n-survey, with runs northwest passes about 500 feet from the northeast corner of our farm. The country will soon be covered with a network of railroads, and It will keep them busy hauling the output of grain. It is certainly encourage. ing to'us settlers.

Two years ago Harry, my son, and I as you know unloaded our car at Saskatoon and drove 180 miles to our claim. Last fall we had only eighteen miles to haul our wheat to railroad and, as you see, the prospects are we ed long enough. It should be boiled 16—will have a railroad at our very door to 20 minutes after boiling begins and and a town near by. This district can served with cream, when it is certainly ipport a good town, and it will be well-

Harry arrived home at 12 p. m. last | Reason."

blacksmith shop to get plowshares beat out. The shop was full of world and it was 8 p. m. when Harry left for home and parties still in line to have work done. We will need stores nearer

and good mechanics. We are all enjoying the best health, which is a great blessing. When we left Chicago over a year ago my youngest son's (4 years of age) health was so poor that I almost despaired of raising him, but he is certainly a hearty, healthy little fellow now. The pure fresh air has done him worlds of good. So, to sunt up the whole: Why should we not be glad we made the break. A suil in his airship from Spitzberger good farm, stock increasing, health and an independent life. What more can

we expect? You can bet we did, and hustle, too. Should you pass this way with your shotgun this fall, we should be pleased to let you shoot prairie chickens off our grain stocks

Respectfully yours, Chas, M. Gerts and family.

A short time ago a gentleman in Boston sent a small boy in his neigh-borhood to deliver a note to a young ludy who lived a few blocks away. He gave the boy a quarter to make him hurry. After a short time the messenback, and, handing the mo said: "Miss Z- says she will be glad to see you tonight, but she didn't want the quarter."-Judge.

is desirable that each sex should occasionally escape from the other. It is restful to the nerves to do so; it is for women to be alone with women tially the place for each sex to find rest from the other and enjoy its own society.—London Lady's Pictorial.

Tickled. Bacon-"I see in some parts of Ireland a belt of woman's hair is placed around the child to keep harm away." Egbert—"I should think that ought the child almost to death."-Yonkers Statesman.

HERITAGE OF CIVIL WAR.

Phousands of Soldiers Contracted Chronic Kidney Trouble While in the Service.

BOY HAS SIXTH SENSE.

Norwegian Lad Can Find, Missing People Through Mysterious Power. A mysterious sixth sense which en-ibles him to find missing persons is the power which is making John-Floettum, the 14-year-old son of a small farmer, an object of curiosity and awe

throughout Norway.

One of his most remarkable successor is recorded by the Aftenposten to have just taken place. A wealthy farmer of Glommen left home and could not be-found. A search party of seventy men-organized by the family scoured the surrounding country without finding any trace of the farmer. Then it vas decided to appeal to young Floet-

tum. The youth was shown a photograph of the missing man, and immediately proceeded\_to\_draw\_a=rough=plan,\_indicating a route through the district. stated the farmer had taken. which he and followed the plan, at the end of

Suddenly he sprang to his feet, cry-ing: "Here he lies." The water was dragged and the body

of the missing man was found.

The boy is credited with dozens of similar remarkable feats, and crowds of people are traveling from all parts of the country to see him.

FOUND OUT.

A Trained Norse Made Discovery. No one is in better position to know the value of food and drink than a

trained nurse.

Speaking of coffee, a nurse of Wilkes Barre, Pa., writes: "I used to drink strong coffee myself, and suffered from headaches and indiges-While-on-a-visit-to-my brothers I had a good chance to try Postum Food Coffee, for they drank it altogether in place of ordinary coffee. In two weeks after using Postum I found I was much benefited and finally my headaches disappeared and also the in-

digestion "Naturally I have since used Postum among my patients; and have noticed a marked benefit where coffee has been left off and Postum used.

"I observed a curious fact about Postum when used among mothers. Itgreatly helps the flow of milk in cases where coffee is inclined to dry 12 up, and where tea causes nervousness.
"I find trouble in getting servants to make Postum properly. They most always serve it before it has been bollWELLMAN POLAR TRIP FAILS.

irship is Wrecked and Plan to Seek Pole Abandoned for This Year. - Walter Wellman on Friday arrived at /fromsoe, Norway, on board the Frithiof from Spitzbergen on his way fome. He announced that he had definitely abandoned for this year, after a disastrous trial of his airship, the proposed attempt to reach the North Pole. World-wide interest had been excit ed in Wellman's proposed trip. Mr. Wellman's plans were as simple as they were spectacular and scientific. With two picked companions he purposed to

to the North Pole, a distance as th crow files of 618 miles. The airship was a dirigible balloon nodeled on the best lines known to French balloon makers. It bore a stee car 115 feet long, which would contain teorological and navigation instruments and a kennel of twenty-nine Alaskar

sledge dogs with sledges. In case of

WALTER WELLMAN.

mishap to the airship or unfavorable winds, the men purposed to abandon the America and take to the sledges for the remainder of the way.

With winds in their favor and the

airship standing the strain well they figured that the trip to the pole could be made in three days. With ordinary but still sticking to the air ship, it might take them twenty days Forced to abandon the America, thele trip might last three months. They had provisions for 275 days.

Starting from Spitzbergen, they fig-1,236 sea miles to the pole and back to their base; to the pole and thence to Alaska, the trip would cover 1,750 Northern Norway, 1.740 miles; to the pole and thence to Northern Siberia, an average of 1,500 miles; to the pole and thence as far south as human habitations in Canada, 2,440 miles.

The airship made an ascent Sept, 2 in a strong northeasterly wind, which It was found necessary to cut the bai on-adrift-from-the-other-parts of the drship, but it was recovered after two days' search.

INCREASE FARMERS' EARNINGS.

Big Gain for Year Due to Higher Prices of Products.

According to a preliminary report on crops, published in the American Agricul-urist-the American farmers' carnings are \$1,000,000,000 greater this year than last This big-gain will be entirely due to the increased prices of farm products, as the production in general will be fully 10 per cent less in quantity than in 1906, which

osition as he is to-day-financially, so cally, politically, mentally and spiritu ally," says the report. "The increase in the value of his real estate has been prodigious. He owes less money than ever before. He has greater assets than ever Again, the farmer's wants are greater. II s in the market for more and bette reeding stock, farm implements, house hold goods and other merchandise."

A Rate Law Test Case.

That State control of interstate railroads has ceased by virtue of the Menappeal to the On the following day the boy led to continue the practice of delivering cars the search party. He entered a boat, to the mill over Sania Ec teacks, which to the practice of delivering cars to the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mills over Sania Ec teacks, which to the practice of the mills over Sania Ec teacks, which to the practice of the mills over Sania Ec teacks, which to the practice of the mills over Sania Ec teacks, which to the demand of the Havana cigarmakers and the mills business was interested. The demand of the Havana cigarmakers that they be resident they be resident the practice of delivering cars. This will have jurismetted to control of the mill over Sania Ec teacks, which to the practice of delivering cars. This will have jurismetted to control of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mills over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the practice of the mill over Sania Ec teacks, which to the practice of the mill over Sania Ec teacks, which to the practice of the p defendant railroad now asserts that the State court has no jurisdiction, and that the road is wholly under the control of the Interstate Commerce Commission.

> Possible Arizona-Nevada Union. Since the proposition for joint state-bood with New Mexico has been rejected by the people of Arlzona it has been suggested that in case Congress shows a disposition to withhold statehood honors from Arizona separately a move might be made toward a union of that territory with Nevada. Such a measure, it is said, will be strongly supported by the very people who have opposed the union with

Yew Mexico.

Use of Scismograph in War. According to dispatches from Vicana some important experiments were made injections for the Lalbach by Prof. Belar, director of the Lalbach enthunake observatory, who used the selsmographic apparatus to see if it was possible to calculate selentifically by the vibrations of the earth the leasting and the series of the work of Sweden has beaten one of the vibrations of the earth the leasting and the earth the least applying after a metallic to relate the relations of the work of the waster and the earth the least applying after a metallic to relate the relationship to the control of the work of the work of the waster and the earth the least of the work in the possible to calculate selecting the control of the work of the work

For Central American Peace. The State Department has received re plies from five of the Central American republics indicating their willingness to co-operate along the lines laid down by President Roosevelt and President Diaz The next step will be the arrangement of a conference, probably to be held at

BIG GUNS ON DEFENSE.

Uncle Sam Has Enormous Rifles to Guard Shore Line. Despite the doct that the United States

pas one of the longest coast lines of any reat power it will shortly afford that other on both the Atlantic and Pacific sides. Work will soon be begun to put on the finishing touches of de-fenses, and fortifications in the insular possessions. Altogether the outlay necessary to fortify and protect the United States proper and its outlying possessions is over \$200,000,000, of which amount considerably more than half has been expended.
The scheme of national defense upon

which work was in progress between 1883 and 1906 was based primarily upon a report submitted to the President by the so-called Endicott board in 1880. This board investigated the entire continental coast line of the United States and recommended the construction of fortifications which were estimated to cost about \$120,000,000. Along the lines mapped out by this board Congress has appropri-ated approximately \$75,000,000. In 1905 the President again appointed

a board to revise the work done under the Endicott board and this time Secretary Taft was its president. After an exhaustive investigation the new national coist defense hourd recommended an additional expenditure of \$51,000,000 to provide fortifications for new places and to modernize the defenses already built on the recommendation of the Endicott

As a result of the work of both boards As a result of the work of both boards the following twenty six ports may be said to be provided with ample sea-coast defenses; Kunnebec river, Me.; Portland, Me.; Portsmouth, N. H.; Boston, Mass.; New Bedford, Mass.; Narragansett Bay, R. I.; eastern entrance to Long Island sound; New York, N. Y.; belaware river; Baltimore, Md.; Washington, D. C.; Hampton Roads, Vn. Cupe Fear river, N. C.; Chneleston, S. C.; Port Royal, S. C.; Savannah, Ga.; Key West, Fla.; Tampa bay, Fla.; Pensacola, Fla.; Mobile bay, Ala; New Orleans, La.; Gal bile bay, Ala.; New Orleans, La.; Galveston, Texas; San Diego, Cal.; San Francisco, Cal.; Columbia river, Oregot and Washington; Puget sound, Wash. A glance at the list shows twenty

two of the twenty-six sea-const defense on the Atlantic coast, mounting approxi mately nine-tenths of the sea-coast guns of the United States.

Otthe United States.
Outside of continental United States, under the recommendations of the Tattocard, sea-coast defenses and naval stations are being constructed at Guanta namo. Cuba: Honolulu and Pearl Harbo in the Hawaiian Islands; San Juan, Porto Rico; Subig bay, Philippine Islands Kiska in the Aleutian Islands and Guam The manning of the sea-coast defenses the estimate provided by the national defense-board it was shown that when all the sea-coast defenses were completed it would require 57,387 men to properly

manipulate them in time of war. manipulate them in time of war.
Yet, according to the last report from
the War Department, there were only
18,941 men in the whole artillery branch
of the army of whom 4,912 were in the
field artillery. The last Congress, boyever, authorized—the formation—of—thir i full regiments of coast artillery proximately 13,000 men to that branch of

A CHAT WITH THE GIRLS.

I heard somebod perhaps it was a neude, say the color do that fashiot able account sider if a disgrace to enter a kitche or know now to make a loaf of bread Now we know some sensible girls who |Co do not consider themselve's disgraced If they are found helping their mothers, and moreover we know that what

the above mentioned prode said is true in many instances. Society at the present day, demands that girls shall be what they call accomplished; and to fulfill this demand the mothers of Christendom teach their daughters that a knowledge of all that belongs to life's duties at liome is not one of the requirements, that manual labor must be consonant

proved style; simper a little French or German, quote poetry—and society mend, that the following bills be alsoys they are accomplished. Doubtless lowed, as follows: proved style; simper a little French they are and by-and-by, as all modern fastionables do, they win a husband. Now is there one of their boasted accomplishments that will help to make or bless a home? We know that music is pleasant, and home is not who where there are no songs or mount harmonies! but'a knowledge of

the plane will not help a woman dischange her wifely duties, and a smattering of French or an ability to waltz wingerully, will do but little towards A proposing a palatable dinner for a initial when he comes home hungry. togen girls have not less ability mont or anabiothers had; the evil

all lies in the principles imbibed in early years. If mothers will teach, rd and deed, that idleness is an ecomplishment, then what may we true women, the blessed homes in the years to come? The woman who would fill life's station nobly and well cannot learn too much. If she fails in her home she will fail in all, for

### EXCELSIOR—EUREKA.

n any age, has there been such a mighty work before the youth of our land as there is today; and we might ay never were young men as ignorant of it and unfited for their work boat while he catches the fish. All seem to believe in luck. Let us say more battles than luck. Wishing is the easiest way in the world to get a poor living. Looking for the fortunate star to rise is like standing on the ocean's strand waiting and watchng for wealth-laden ships to com over the sea that never "put out." Wishing brings a small income, and the taxes on it are enormous. Don't say the world owes you a living until you have earned one. Idleness in boys and girls is the blackest curse of any land. There is just as great a work man as for the young man. When the girls, in earnestness, cast aside the loose cloak of vaia fickleness, and donning the beautiful garments of laboring purity, come forth from the asking "What\_shall\_we do?"; and penying the motto "Woman's ability shall see light," then the boys will become more earnest; more temporate, more like men. Dear young people be not afraid or ashamed of labor. Hard hands, strong arms, and sunburned faces are honorable. Take "Excelsior" for your motto, and if you are patient, in a few years you ean surely write under it that other good word, "Eureka."

### SCHOOL LAW.

Some Important Changes Made the Legislature.

The truancy or compulsory law as amended by the last legislature specifically provides that all children maximust patiently abide his between the ages of 7 and 16 years inc. He must wait, not in idleness, shall attend school the entire school vear and the attendance must be con steamy offing and accomplishing his emptions children who are taught in who that when the occasion comes he a private or parochial school in the The talent of branches usually taught, in the public machines more than doing schools, who upon the completion of druggist. Suc. what you can do well, without thought the work in such schools shall satisfy of faces of it comes at all it will come the county commissioner or superinis Sough after. It is very indescreet completed the work of the eight grade schools are exempt. The truant offiext of what we do on say; to be all cer is authorized to secure the written to hear the echoes or statement of a competent physician when it is claimed that children are physically unable to attend school, and children over 14 years may be excused by the county commissioner or city superintendent on recommendabetween 12 and 14 while attending confirmation classes conducted for

QUARD FOR POLICY HOLDER DE-CLARED BY COURT.

Decision Is that He Can Rescind Contract if Fraud Is Shown-Train Runs Into Torondo in Pennsylvania.

The Appellate division of the Supreme Court, sitting at Saratoga, N. Y., has handed down a most important decision. The effect of the decision is that where an insurance company is guilty of fraudon a policy holder at the inception of the contract, the policy holder, on discovering the fraud, can rescind the contract and etand the loss that ensues from its wrong-tand the loss that ensues from its wrongdoing. The case at issue was that of John Moore, a lawyer and editor of the Elmira Telegram, against the Mutual Reserve Life Insurance Company of New York. The case was tried in Elmira before Justice Lyon in May, 1900. Justice Lyon found that the fraud alleged had been committed by the false statements made to Mr. Moore personally at the New York office, declared that the policy should he rescinded, but charged the plaintiff with the cost of the company for carrying the life insurance for fourteen years and gave to plaintiff damages of only \$292. Mr. Moore at once took an appeal, asking that Justice Lyon's decision be modified by giving him judgment for \$3,-630, the amount he had paid as premiums. with interest, and as modified the judg-ment be affirmed. The insurance company also took an appeal, asking that the entire decision by Justice Lyon be reversed. The decision establishes a precedent in this line of cases, and it is probable that it will be carried to the Court of Appeals. in that event, the insurance ompany will have to give a bond.

Nation Physically Ailing.

That about one third of all the school children in the United States, or about 25,000,000 boys and girls, are behind their proper grades because of physical defects that could be remedied is the gist of a report made by a committee of prominent educators, headed by Charles C. Burlingham, formerly of the board of education of New York City. This committee has investigated conditions among INSURED HAS RIGHTS school children, not only in New York, but in Boston, Chicago and other cities. "Bused on the physical defects and home conditions of 1,400 school children of New York City," says the report, "It is estimated that 12,000,000 of the children of mated that 12,000,000 of the children of the United States have physical defects more or less serious, which should receive attention from parents and physicians. If the percentages recorded by the board of health in New York should be maintained throughout the country, and it seems likely that they would be, as adenoids and impaired Tsion; maintritton and defective breathing are found in rural as well as urban schools, there must be s well as urban schools, there must be as well as tream schools, there must be the control of the control 230.800—a total of 465,800."

> MANY CHILDREN ARE AFFLICTED Epidemic of Infantile Paralysis

> Spreads in New York City.
> The epidemic of infantile paralysis in New York City is assuming alarmin proportions, according to the reports of nospital physicians who have the disease under observation in the hope of discovering the germ which is supposed to be responsible for the infection. There are now under treatment in various hospitals between 300 and 400 children who have the disease well developed and most of them will be hopeless cripples for the rest of their lives. The hunt of the infantile paralysis germ, led by Dr. J. F. Terri-berry, third naurologist of the hospital for raptured and crippled stall, began severul weeks ago when the present epi-lemic was in its earlier stages, and is still in progress. But in spite of the fact that several hundred afflicted children have been examined the trail of the germ is no more clear than it was at first. The the summer and has grown stendily. Neu rologists say it is probably at its height and that the approach of cooler weather will gradually lessen its ravages.

BANDITS LOOT TRAIN

RIFLE MAILS OF THE GREAT NORTHERN'S LIMITED.

Hold-up at Rexford, Mont., Lutest of -Indians Make Gold Discovery in Alaska.

Two masked bandits early Thursday held up and robbed the Great Northern's Oriental Limited train six or seven miles west of Rexford, Mont. They found the regular through safe empty and stole a quantity of registered mail. This is the latest of repeated efforts to loot the Great Northern tening of here sugar and seconds. Northern trains of large sums, and recalls the fact that about two years ago two train robbers, after serving scutences in prison. tried to blackmuil the company out of \$50,000 by threats to blow up trains. Heavy charges of dynamite were found under several bridges after the threats were made. In the holdup Thurs-day morning the robbers crawled over the trains. tender and at the point of their guns commanded the engineer to stop the train. Then they ordered the engineer to go back with them to the express car, and instructed him to tell the express messenger, mail clerk and baggage man to go back into the coaches. While this was being done the robbers kept up a conthe passengers and keep them within the conches. After the messenger, baggage man and mail clerk had left their cars. the robbers went through the mail cars and robbed the sacks of a large quantity of registered mail. Then they went into an express car which carried an overflow of mail, baggage and express and which contained a regular through safe. This they attempted to blow open. After exploding three charges, the safe was opened and it was found to be empty. The robbers did not enter the regular express car in which the messenger had been riding. On finding the safe empty the high waymen helped themselves to the regis-tered mall, and after firing a parting rolley,\_disappeared.

CHICAGO MAN LOSES SAVINGS.

Thieves Torture Him in Home and Get Seven Hundred Dollars. Two masked robbers invaded the home of Isaac Chaley. 50 years old, 502 Sangaof Isaac Chaley. 50 years old, 562 Sangamon street. Chicago, tortured the man until he revealed the hiding place of his valuables, and then escaped with \$700, the savings of a lifetime. Chaley. afterhe hid been kicked and beaten, visited the police station and told of his less. The victim of the robbery was badly injured and almost crazed with order over the loss and almost crazed with grief over the loss of his proporty. Chaley said that he was in which he slept. A second man follow-ed and both seized him before he could make an outery. They pointed revelvers at him and demanded his money. When he declared he had no valuables they selzed him by the throat and dragged him from the hed. They continued to beat him and threaten to burn him. One o One of them held a lighted match to Chaley's bare foot and then Chaley revealed the hiding place of his money. With tears streaming down his face Chaley watched the robbers rin open a mattress and serobbers rip open a mattress and se-the money, \$225 in gold and silver and \$475 in bills, which he had concealed. When he plended with the men to leave an amount to pay his rent, which and laughed at him as they escaped through the window.

FIND RICH VEIN OF GOLD.

Indians Make Discovery and Klon-dike-Fever-Breaks-Out Again. The Klondike gold fever has broken out nnew at Sitka, Alaska, according to Brig. George F. Elliott, commandant of the United States marine corps, who has just returned from a trip of inspection in the Northwest. Gen. Elliott says a rich vein of quartz has recently been un-covered on an island forty-five miles from

vields a heavy percentage of tory of the discovery, as told to Gen. Elliott, is that two Indian They told the news to a Presbyterian clergyman at Sitka. A company opened the vein and succeeded in mining and transporting to Sitka in cances ninety tons of

This one shipment yielded after payment of freight more than \$16,000. The knowledge of the find soon spread, and the island now is practically all staked out by gold seekers.

Because of the restraining order grant-ed by Judge Munger of the federal court-in Lincoln, Neb.: to prevent the railway commission from promulgating a new grain-rate schedule, Gov. George L. Sheldon has declared himself in favor of a federal courts the right to enjoin State officials from enforcement of State laws.

"Ladjace the rederal courts have abuse the privilege of the injunction enough to ustify such action." he said. "Too many State laws have been tied up by the iterference of the federal courts. I do n helieve the makers of the constitution ever ontemplated such use of the injuncti

in the hands of the federal courts." TRIP TO NORTH A SUCCESS.

Member of Mikkelson Party Reports Progress in-Exploration.

Prof. Steffanson of Mikkelsen's party hailed the steamer Koyukuk at Fort Yukon on Sept. 3. Steffanson said he was chriving dispatches. He reports that the members of the Mikkelsen party made the trip north over the ice and were successful. They encountered frany hardships during the trip from Herschel Island and up the Mackensie river and down the Porcupine. He reports the party all. the Porcupine. He reports the party al well and safe.

Street-Car Riot in Frieco A serious riot took place early Wed-nesday morning at Twenty-fourth and Utah streets, San Francisco. A number of employes, while running a car of the United Railroads into the barn at this point, were attacked. During the fight five carmen were wounded, one of thom, it is believed, fatally.

Southwest Limited in Wreck Chicago: Milwaukee and St. Paul pas-enger train No. 12, the Southwest lim-ted, was derailed at North Junction, Mo., resulting in serious injury to Engineer. Parish and Fireman Huber. None of the passengers was injured. The train was delayed four hours.

Lusitania Makes New Record. The big liner Lusitania reached New York, making a new record from Queens town, but falling to wrest first place in Icean racing from the Deutschland. ATTACK ON ORIENTALS. ver Mob Wrecks Quarters

\* Japanese and Chinese.

A special from Vanncouver, B. C., says: Following a riot Saturday even-ing in Vancouver, in which Chinatown and the Japanese quarters were raided and damage done approximating \$15, Repeated Attempts to Rob Trains 000, a further demonstration occurred later in which Kichi Yjro Ishii, chief of the bureau of foreign commerce and head of the Japanese consular service and Consul Saburo Hisamidzu of Seattle were the central figures and in which riot a number of people were bruised and injured by broken bottles and flying brickbats in the hands of a frenzied mob. Baron Ishli and Consul Hisamidzu, finally made their escape through the mob and the affair was

immediately cubied to Tokio.

Coincident with the riot was the ar rival of a steamship having on board at least 500 Japanese. With a commo impulse the mob surged to the water front, and, as soon as the Japanese came down the gang plank, they met by the rloters. Seven or eight of the Japanese were unceremonlously picked up and thrown into the Burrard inlet.

Still further rioting occurred when a crowd of about 4,000 laborers started on the warpath, but were finally quelledby the police after about twenty ard been made. Chinatown was roped off and the quarters of the orientals guarded by the police. Baron Ishii gave out an interview, in stated that he had cabled to Ambassa dor Kaneko at London, apprising him of the stirring events.

Indemnity from the city to the amount of \$25,000 will be claimed. Mayor Bethune declared the indemnity will not be paid, and the affair will be taken up with the dominion govern-Saturday night's rioting was the

ALPS CLAIM 17 VICTIMS.

High Temperatures in Switzerland Make Climbing Hazardous.

Seventeen deaths and thirty injured nake the casualty roll of the Alps thus far in the mountain climbing season of this year. The mountain guides expect this number to be largely increased bethis number to be largely increased before the season ends, for the heat now prevailing in Switzerland and the recent earthquake epidemic have combined to make climbing specially hazardous. Avalanches are continually forming and falling in the most unexpected places, owing the internet hat weather.

to the intensely hot weather.

The Simplon, always noted for the se rious avalanches, falling from the Glet-schorn glaciers, was early in July the scene of an immense fall of snow and rock, owing to the bursting of a glacier-lake on the Bodmer, caused by the heat. A somewhat similar fall swept down the St. Gothard line near Lucerne.

On the St. Bernard avalanches have been frequent duving the near fortuity.

been frequent during the past fortnight and the dogs have been busily engaged in seeking travelers who have been over-whelmed by snowfalls. Last week three ricilians were swept away on the Swiss side of the pass. Their bodies have not been tound and may not be seen again.

Scarcely less dangerous are the wonderful ice avalanches or "eislawinen," which are among the wonders and perils of the Jungfrau, the Matterhorn, the Piz Bernina and the Aiguille des Charmov.

These marvelous falls of glittering gleaming ice consist of thousands of spar kling tons of shattered and twisted seracs or ice needles, which have fallen from the glaciers and been precipitated down the mountain by the heat of the sun and the action of the weather. The huge falls or cataracts of ice are a terrible who rashly ventures into their vicinity after sunrise.

2-CENT FARE LAW NULLIFIED. Pennsylvania Judges Declare Status

Judges Willson and Audenried, in Comnon Pleas Court at Philadelphia, declared unconstitutional the 2-cent railroad fare law passed by the last Legislature. will be at once taken to the State Su-

preme Court.

The 2-cent fare law was enacted by the Legislaturg as a result of agitation during the pledging themselves in favor of it.

The proported to the department. The number of typhold cases directly traceable to the outside vacation habit is much larger than last year, when the percentage was pledging themselves in favor of it.

MARCH OF THE G. A. R.

VETERANS PARADE THROUGH SARATOGA N. Y.

Gov. Hoghes and National Officers Lead Line Through Blaze of National Colors and Then Review Ranks-Flag Draped Grant's Bier.

Martial music, the old war-time tune to which the soldiers of the Civil War. had marched in many campaigns awakened Saratoga at an early Wednesday—the day of the parade of the veterans who attended the national encumpment of the Grand Army of the Republic. It was expected that 15,000 paraders would be in line and the weather, which was unfavorable in the early morning, gave promise of bright ening before the hour scheduled for the start. Significant of the fulling strength of the veterans was the fact that the pa-

rading distance was reduced to one mile—the shortest ever fixed for the national encampment. For the first time the parade was dimited to members of the Grand Army instead of being open to all survivors of the war. The national colors covered the fronts of buildings, were festooned at every convenient point, strung in rows at short intervals across the streets and completely covered the interior of the great convention hall, where the se sions of the encampment were held.

Flag Recalls Gen. Grant. One of the features of the parade was the presence of a big flag which covered the body of Gen. Grant on its way from Mount McGregor to the tomb. In custody of the grenadler guard, command ed by Col. F. M. Sterrett of St. Louis of which every man was over six feet tall and each representing one of the forty-five departments of the G. A. R. this old flag brought up the extreme rear, escorted by the whole parade and peing carried at last along the whole line of review.

As planued, the national officers in carriages with Gov. Charles E. Hughes ed the line, the chief of staff in com mand being J. Cary Winans of Toledo The department of New York State although entitled by seniority to fifth place, selected as hosts the left of the line, which included a representation of every department, including Alaska and of every branch of the ser purade was reviewed by Gov. Hughes

and the national officers of the G.A.R. The day's program began with a reeption at Congress hall, the New York State headquarters, in honor of Gov. Hughes at 11:30 a.m. At 12:30 hunch eon was served by the department of New York to the Governor, Commander in Chief Robert B. Brown and his staff past national officers, department commanders and the other distinguished guests. Meanwhile there had been reunions of the various organizations

The real business of the convention began Thursday with the annual address of Commander Brown, reports of officers.

VACATIONISTS IMPORT TYPHOID Physicians Declare Them Responsi-

ble for Spreading Disease.

If Chicago people had stayed at hom during their vacations this summer ap during their vacations this summer and drank good lake water, the health denartment would not be coping with nearly 200 cases of typhoid, as is the case at present. This is the conclusion of the health officers, who have made an exhgus-live investigation of the situation. They wondered what was causing so much ty phoid, as the city itself is healthy enough challing for facts from attending physi-cians, the guardians of Chicago's sanitary welfare found that 51.0 per cent of the Calling

total number of typhoid were contracted outside the city. This figuring was made on the basis of known cases. There may be many other cases in the city for al the Board of Health knows, as a of otherwise careful doctors have a habit of keeping the news to themselves when they are treating a discuse which should he reported to the department. The num

The rentrones, ied by the rennsyrvania and Reading, made a strong fight against the law, but both branches of the Legislature passed the bill by practically an unanimous vote. The law was to go into effect. Oct. 1.

The Panaglania was the free to the law in the seeker after country joys to take along a cask of the real thing taken from Lake Michigan for drinking purposes. The The Pennsylvania was the first to attack the law. SAFE HOME FOR BIRDS.

ervations in Gulf of Mexico Main tained by Audubon Societies. To make of the unknown inland region of the Gulf of Mexico one great reserve for the birds of the nation is the project which, it is announced, will be immediately undertaken by the Na tional Association of Audubon Societies, says the New York Post. Reports of a dangerous and difficult exploration of the remote sea isles of the coast of Louisiana from the Sabine river to Pass a L'Outre have been received from H. H. Kopman, the ornithologist, who was dispatched by the association several months ago in quest of com-plete information on this practically unknown territory of the United State As a result it has been decided to add all of the insular tract, if possible, to the reservation of twenty-seven similar Islands now maintained by the Audu-bon workers east of the Mississippi's mouth, as undisturbed havens for the hosts of birds looking for breeding places.

Applications for the right to retai for this purpose such of these islands as are government property will be made by the Audubon association to the Federal authorities in the near fu ture and every effort will be exerted to secure similar rights on islands held by private interests. On the formation of their coast reservation east of the Mississippi prompt assistance has al-ways been given the Audubon workers by the government in the acquisition of island territory, but they have found to henvy financial burden to acquir similar rights from private holders With the island stretch both east and west of the delta of the Mississippi ac quired, this country will afford its birds the most extensive and useful breeding reserve in the world.

The Kopman explorations, as report ed to William Dutcher, president of the association, will prove a valuable addition to geographical, as well ornithological records. Many Islands not named on the official charts have been discovered, and several colonies of birds were found whose existence l these particular regions had been pre viously only conjectured. In all. 22,700 pelicans, terns, black simmers, and-gulls-were-found-in-broad ing condition. Although on islands of the present Audubon reserve the birds have become so tame that they pay practically no attention to man, in great many of the remote regions just risited they exhibited signs of fear which showed unmistakably that they were frequently molested even in these inaccessible breeding grounds. Most curious of all the observations

made by the Audubon expedition were the "mudlumps" of the passes of the Mississippi outlet. These woird-islands rise, sink and reappear elsewhere in an unaccountable manner, and are used by the timid bird flocks very extensively for breeding coionies. They often cove an acre and rise six or eight feet above high-tide level in their shifting processes. The action of gas and oil domes and the effects of sedimentation are variously assigned by scientists as the causes of these pheno

The exploration of this region is al most the final step in a general survey of the Atlantic coast line of the entire country, which was started at the uppe boundary line of Maine some years ago At great expense the National Associa tion of Audubon Societies has now ob tained full and complete information of all the baunts and habits of the birds who frequent the east coast country One more survey will be made, as soon as available funds warrant it, down to the lower extremity of the Texas coast Eventually, the Audubon workers inproductive observations along the entire line of the Pacific coast as thor oughly as they have covered the Atlantic seaboard.

Petitions to an Emperor. One of the most interesting features of the emperor's visit was the number of petitions which were, so to speak thrown at him during his fortnight' stay. Scarcely once did his majesty drive out from the Hradschin without somehody attempting to present an ap struction. Flames were discovered in peal. Usually the petitioner was a large analysis peal, given by store and her peal. Usually the petitioner was a fore they could be checked had destroyed property to the extent of \$25,000. Most of the requests were for pecunically discovered and destroyed and destroyed the court of \$25,000. Most of the requests were for pecunically discovered and destroyed and destroyed and destroyed the letter ways extremely courteons, and when the letter destroyed and implements. missed the carriage and fell into the road he invariably ordered the coach man to stop while the document-was inghway live of six rolls in length and brought-to-him. To Hurry Up Canal Work. Many members of Congress who pect to be on-the committees which

will be called upon to make appropria tions for the Panama Canal are mak ing arrangements to visit the isthmus before the session begins. They will do this for the purpose of seeing what work has been done, what is doing and what is needed to be done. The President, it is understood, is to give nore space to canal matters in his coinfore, and Congress will need to inform itself on the subject at first hand, in order to act intelligently. The President made a trip to the canal zone last e a trip to the fall, and the result was quickly seen some changes which he made in the working forces at the isthmus, and in legislation which he urged in a special message.

One of the objects of the coming visit of congressmen to the isthmus is to devise means to hurry the work forward. As the army is in charge of the construction now, report says that far more progress is being made than was done during the civillan regime. nen who are doing the work, and there is no posing before the camera. During the administration of the civil lans the country quickly got familian with the pictures of Wallace, Stevens Shonts and the others, but nobody out side of the canal zone knows what the present head of the constructive forces ooks like, and very few know his name. He attends strictly to business, and the newspapers get no chance to

mention him. Still, it may be possible for the pres ldeut and Congress to devise means to hurry up the work of canal building by strengthening the hands of the army If this can be done the country wants t to be done. The fact that the fleet or the Pacific will have to sail 15,000 or the Pacific will have to sail 15,000 If the task is begun now with deter-niles to reach a point which could be imination, and is carried on in faith, reached in 5,000 if the canal were coman eloquent reminder that that short-cut ought to be pushed with all possible speed. The country pending a good deal of money in canal building, but it is willing to spend more if the undditional outlay will bring completion a year or two earlier The Panama issue is one of the most interesting questions which will come efore Congress this whiter. St. Louis Globe-Democrat.

Hoping for a Word, Chleago Democrats are hoping, through the medium of the national ommittee, to smoke out William-Jen lings Bryan, Chicago is bidding for the convention, but it fears that with Bryan in complete control, the will switch the blg gathering to some other city for the reason that Chicago is not

over with enthusiasm for the Peerless One.

Ever since Bryan undertook to teach Roger Sullivan his duty as a Demorat, there has been a growing revolt in Illinois against the Nebraskan, Sullivan, it will be recalled, is a member of the intional committee, but Bryan chins there is a taint to the title, and hence personally advised him to retire. This imperiffence brought a fart r ply, from the effects of which Mr Bryan has not yet recovered. But the Democrats of Chicago don'

intend this little political duel shall de They have invoked the aid of Folk's program is designed to place Bryan on mutual advantage will rived. The Missouri governor has a little bee buzzing in his bonnet. He mows he won't cut much of a figure if Bryan-trios to ho the while should the latter eliminate him self, the Folk boom might assume dinensions. Several members of the national committee are friendly to Folk and if these can be lined up for this cago, it is thought Beyan-will-be com-

pelled to aunounce his position. most remar eakness of the Democratic party is this confession that before anything can be accomplished Bryan must be consulted. Even as confugeous a man as Watterson admits that Bryan, the man who has done more than any other party, can and probably will, dominate the next national convention. Yet how quickly life could be galvanized into that party were Bryan to announce his retirement!-Toledo Binde.

-Wouldn't It Be Better The constitution of the United States wisely provides that all meas ures for the ruising of revenue originate in the House of Representa tives. This is because the House of Representatives is supposed to be closer to the people than any other body. Almost without exception our experi ence has shown that when matters-like this are left to the State Department the United States gets the worst of it. Wouldn't It he botter to adhere strict ly to the spirit as well as to the letter of the constitution and let Congres pass on all these matters?—Cedar Rapds-Republican-

The goods imported from Germany are tirtually under the new agreement flowed to enter at the value certific by the German Chambers of Commerce Thus the duty on German goods is less than that exacted mon the products of countries, which are an ad valorem rate of duty, because the lower the value at which imports are appraised the less the duty. Until we allow France, England and other countries the same favor it can hardly e called a square deal. The Manufac turers' Association and the stand-pat ters object to this agreement with Ger nany because it thus reduces the rate of duty in this round-about way. - Sa lom (111.) Democrat.

A-new prize of \$10,000 is offered in France for the invention of a dirigible balloon.

That Mr. Bryan will seek the Dan cratic nomination in 1908, and expects to receive it, is announced by a recogni nized Bryan spokesman in New York

There is nothing surprising about this. It is a logical consequence of political developments in the last three years.

The national Democracy, as far as it has an organized existence, stands for nothing but Bryanism. Mr. Bryan is its only presidential possibilty of na-tional dimensions. Unless there is a revolution within the party, either Mr. Bryan or some man selected by his will he the Democratic candidate What will be his chances of election

To all clear-eved and cool-headed of servers they now seem better than I 1900, and almost as good as they were

The reason is not that the Democra le party has grown stronger, but that the Republican party has grown weaker. So many conspicuous Republican enders have gone so far with Mr. Bryan that his candidacy seems a log ical consequence of their campuign. To make the point clear, let us re call how Mr. Hearst, in his campaign for the New York Governorship, justi led himself and his doctrines by printing in parallel columns with his ow views the inflammatory utterances of several national Republicans, How. then, shall the Republican party d feat Mr. Bryan? How save the coun try from the disaster of his election?

Plainly it can do so only by adop ing a platform of Republican and American principles, by selecting lead ers whose lives and character oth the ideals through which this nation has grown great and prosperous above all others, and by thus bringing the American people to a new birth of lope and faith in their country, its institutions, and themselves.
The outlook is not dark or discourag-

ng. It is necessary only for the R publican party to do its duty and attend to its business. It has a year in which to accomplish a task more difficult but of the same kind as that with which it grappled successfully in 1896.

nothing wavering, we some day shall all look back upon 1908 as we now do upon 1896, and confess that nothing out our own follies put us in fear .-Chicago Inter-Ocean.

Prosperity to Stay. Secretary Wilson of the Department of Agriculture has returned to Washington from the West with good reports of the ripening crops. The West en farmers have plenty of nioney and are-soon to have a great deal more ince-they are getting ready to-send to market-enormous-quantities-of grain and other products. Good prices for them are amply assured. So the proess by which an abundance of money is put into circulation is about to begin all over again under favorable conditions.

The searchty of money for investment and speculation in Wall street and other financial centers presumably willincrease during the next few weeks. since the moving of the grops will chose the West and South to withdraw their surplus funds to be used in transtions throughout the regions of actual production. The easing process, so often provided by the national treas ury, of preventing a breaking strain by the deposit of government funds in banks in New York and other financial enters will come into play once more. But while the big financiers are look ing glum and stocks are sagging on tion will be largely increasing their stores of money:

That is prosperity. For the producs' money soon flows back to the financial centers from the local banks the cities where it has been expended for supplies. So long as it is not squandered in foolish speculation or lost in the heart-breaking process tolling through unprofitable years. roads, which are now required to carry at a reasonable charge, is an important lement in the present period of pros perity.—Chicago News.

A Swing Around the West. Secretary of Agriculture Wison has returned to Washington from a jour ney that lasted several weeks. secretary has a story to tell of general prosperity and he is a practical judge of the real article. He reports goo times everywhere in the-West, with no of panie anywhere he is convinced, is moving from Wes to East. Crops, with few exceptions are good. The yield of corn promises to be large, and prices are unusually. favorable to the farmer. Emigration the new lands of Western Canada is falling off because the conditions and opportunities at home are more attractive. Secretary of the Interior in the Southwest. His view of the sit ation and prospects is the same, and he finds the great irrigation projects ving along in good shape, The dwindling of speculative values

n-Wall street interests the West much less than the bulls and bears imagine Porlings the estimate is correct that stocks dealt in by Wall street have de clined \$1,750,000,000 since the begin ning of the year, but the values that up the sum of activities in the West are not shrinking. Lands are not lower; the products of the soil bring excellent prices; the railroads have all the business they can handle: manufacturing-shows-no-falling off and thining grows from year to year. Paper values in Wall street may he untisfactory to their chief manipulatok, but the fletions they cultivate in enter and ring boards of directors can be dispensed with to public advantage Wall street has been notified to mend its ways, and to divest itself of the idea that it is the pivot of prosperity in the United States St. Louis Glob

Don't eat pickles of any sour when nursing the bahy,

nd, says a writer in American Agriculturist. These are both good varieties, good shippers and also good market varieties. We prefer the Loudon as a table berry, also for canning purposes. It also ships well, making a fine ning. Raspberries are good feeders, requiring a liberal amount of plant food ment.

appearance in the box, having a deep red color, which does not fade in canand responding readily to good treat-The Climbing Rose.
The rose is not a natural climber; it

can ramble over low shrubs, large bowlders and such things, but when grown about a veranda nillar it must be artificially supported by tying up easionally as it grows. This is mo intisfactory than ignoring it until the end of the growing season. It is then hard job to straighten out the badly tangled or twisted shoots, and the wind is likely to break them when they are

very long. Never let one shoot grow upright for oo long a period or get very far ahead of the others, advises a writer in the Garden Mazagine. If you do, the trongest or leading shoot will receive he greatest quantity of the sap and the plant, by throwing its strength to the top, will soon become nude at the

Variation in Plant Foods.

Plant foods vary in composition, and the most fertile farm may lack in some particular element of fertility. Manure that does not contain all the essential ents that tend to recuperate the soil is not in itself complete. It will, course, enrich the soil, but as the soil does not receive from the manning all that it yielded in the shape of food, no figures are necessary to de that in the course of time the sale of milk-will exhaust the soll-of-plant foods (mostly of nitrogen), including potash, phosphates and other mineral It is admitted that a grass matter. plot will be largely assisted to secure nitrogen by the rains (which bring down ammonia and nttric acid), and with clover (with the aid of bacteria), but these sources do not admit of deriving the potash and phosphates. nitrogen so secured is but a small proportion as compared with that daily sold in the milk, the total amount of milk annually leaving some farms-be-ing many hundreds of cans. The amount of nitrogen, potash and phos-phates sold from farms that provide for large herds can not easily be estimated, but suffice it to say that the quantity, though not apparent, is very arge, and in the course of a few years the soil must certainly be affected.

Neglected Old Orchards.

In almost any part of our State can be found orchards of advanced age which do not pay, and it is readly seen that something is wrong. The problem of renovating an orchard is sometimes a large one and often proves to be very expensive. The causes which are re sponsible for an unprofitable orchard are many and may be briefly stated thus: Unsuitable varieties, poor drainage, unfavorable site, poor soil, neglect, unfavorable climatic conditions and old

The first and most important point in rejuvenating an orchard is whethe or not the trees are worth saving. The varieties may not be what you desire or too far gone to be responsive to treatment. If the trees are on land, cut them down or thoroughly over thirty-six or thirty-seven years old. which have long been neglected, are not worth saving; likewise the cherries over twenty, the pear over twenty-two or twenty-three, the plum over fifteen In fact, the trees which should not be d with are those may be very economically reclaimed. Oregon Experiment Station.

In a study of the mites on apple and pear trees, five species have been recognized by the New York station Briophyes malifolia, E. pyri, E. pyri and Epitrimerus pyri. Erlophyes pyri, mite, is the most abundant and the most injurious species. The structure, habits and systematic position of these pests are discussed and a list is given of all American species of the family with their host plants and an analytical table for their identification.

Particular attention is given to E pyri, which produces the well-known olister spots on the leaves of pear and amble trees. On apple trees the blis ually are less brilliant. The mites inas the leaves, and have been found on 250 varieties of apples. After a little experience the injuries caused by mites may be readily distinguished from those due to spraying or to the apple rust. A parasitic mite was found preying upon the blister mite and to described as a new species under the

name Selus pomi. In experiments on apple trees a comparison was made between k for light buggles and carriages there is oil, miscible oil, kerosene emulsion, dothing better than castor oil. Be whale oil soap and the sulphur washes, more the wheel and wipe the axle and the latter being prepared according to various formulas. harmlessness, cheapness and efficiency, kerosene emulsion diluted with five parts of water and applied during the If too much is used it will run out and dormant season is recommended as the most practical remody for the treat ment of apple orchards infested with-the blister mite. In pear orchards this pest may be controlled by proper prunemulsion in the fall or spring.

## INSURED HAS RIGHTS

GUARD FOR POLICY HOLDER DE-CLARED BY COURT.

Decision Is that He Can Rescind Contract if Fraud Is Shown-Train Runs Into Torpado is Pennsylvania.

The Appellate division of the Supreme Court, sitting at Saratoga, N. Y., has handed down a most important decision.

The effect of the decision is that where an insurance company is guilty of fraud on a policy holder at the inception of the contract, the policy holder, on discovering the fraud, can reseind the contract and recover all the premiums paid, with interest, and the defrauding company must stand the loss that ensues from its wrong loing. The case at issue was that o John Moore, a lawyer and editor of the Elmira Telegram against the Mutual Re-serve Life Insurance Company of New York: The case was tried in Elmira before Justice Lyon in May, 1900. Justice Lyon found that the fraud alleged had been committed by the false statements made to Mr. Moore personally at the New York office, declared that the policy should be rescinded, but charged the plaintiff with the cost of the company for carrying the life insurance for fourteen years and gave to plaintiff damages of only \$292. Mr. Moore at once took an appeal usking that Justice Lyon's decision b modified by giving him judgment for \$3, with interest, and as modified the judg-ment be affirmed. The insurance company also took an appeal, asking that the entire decision by Justice Lyon be reversed. The decision establishes a precedent in this line of cases, and it is probable that it be carried to the Court of Appeals However, in that event, the insurance ompany will have to give a bond.

BANDITS LOOT TRAIN

RIFLE MAILS OF THE GREAT NORTHERN'S LIMITED.

Hold-up at Rexford, Mont., Latest of Repeated Aftempts to Rob Trains -Indians Make Gold Discovers to Alaska.

Two masked bandits early Thursday held up and robbed the Great Northern's Oriental Limited train six or seven miles west of Rexford, Mont.—They found the ramilar through set among and stale a regular through safe empty and stole a quantity of registered mail. This is the latest of repeated efforts to loot the Great Northern trains of large sums, and recalls the fact that about two years ago two train robbers, after serving sentences in prison, aried to blackmail the company out of \$50,000 by threats to blow up trains. Heavy charges of dynamite were found under several bridges after the threats were made. In the holdup Thursday morning the robbers crawful over the tender and at the point of their guns consmanded the engineer to stop the train. Then they ordered the engineer to go back with them to the express car, and instructed him to tell the express messenger, mail clerk and baggage man to go being done the robbers kept up a continual fusillade with their guns to terrify the passengers and keep them within the couches. After the messenger, baggage man and mail clerk had left their cars, the robbers went through the mail cara and robbed the sacks of a large quantity of registered mail. Then they went into an express car which carried an overflow of mail, haggage and express and which contained a regular through safe. This they ittempted to blow open. After ex-ploding three charges, the safe was open-ed and it was found to be empty. The robbers did not enter the regular express car in which the messenger had been rid-ing. On finding the safe empty the hightered mail, and after firing a parting

CHICAGO MAN LOSES SAVINGS. Thieves Tortage Him in Home and

Get Seven Hundred Dollars. Two masked robbers invaded the home Isaac Chaley, 50 years old, 562 Sangaand almost crazed with grief over the loss of his property. Chaley said that he was awakened by a noise and saw a man crawling through a window of the room in which he slept. A second man follow-ed and both seized him before he could quake an outery. They pointed revolvers at him and demanded his money. When he declared he had no valuables they selzhed declared he had no valuances they seed him by the throat and dragged him lake out the Bodmer, caused by the heat. They continued to beat him and threaten to burn-him, one of them held a lighted match to Chaley's Continued the beat fact and that Chaley revealed the beat fact and the fact and fa bare foot and then Chaley revealed the streaming down his face Chaley watched the robbers rip open a mattress and secure the money, \$225 in gold and silver and \$475 in bills, which he had concealed. When he pleaded with the men to leave him an amount to pay his rent, which was overduc, they struck him in the face and laughed at him as they escaped through the window.

FIND RICH VEIN OF GOLD,

Indians Make Discovery and Klon dike Fever Brenks Out Again. The Kloudike gold fever has broken out ew at Sitka, Alaska, according to Brig. Gen. George F. Elliott, commandant of the United States marine corps, who has just returned from a trip of inspection in the Northwest. Gen. Elliott says a rich vein of quartz has recounty been un-Sitka which yields a heavy percentage of leaf gold.—The story of the discovery, as ald to Gen. Ellion, is that two Indian while fishing noticed particles of gold. They told the news to a Presbyterian clersyman at Sitka, A company opened the vein and succeeded in mining and transporting to Sitka in canoes ninety tons of ore. This one slipment yielded after payment of freight more than \$16,000. -knowledge of the find soon spread staked out by gold seekers,

## TO CURTAIL FEDERAL POWER

Gov. Sheldon Favors Barring U. S the privilege of the injunction enough to-justify such action," he said. "Too many State laws have been tied up by the in-terference of the federal courts. I do not believe the makers of the constitution ever ontemplated such use of the injunctio in the hands of the federal courts."

## TRIP TO NORTH A SUCCESS

Member of Mikkelsen Party Reports Progress in Exploration.

MARCH OF THE G. A. R.

VETERANS PARADE THROUGH SARATOGA N. Y.

Gov. Hughes and National Officers Lead Line Through Blaze of National Colors and Then Review Ranks-Flag Draped Grant's Bier.

Martial music, the old war-time tunes to which the soldiers of the Civil War had marched in many caninaligns awakened Saratoga at an early hour Wednesday-the day of the parade of the veterans who attended the national encampment of the Grand Army of the Republic. It was expected that 15,000 paraders would be in line and the weather, which was unfavorable in the early morning, gave promise of brightening before the hour scheduled for the start. Significant of the falling strength o

the veterans was the fact that the parading distance was reduced to one mile—the shortest ever fixed for the national encampment. For the first time the parade was limited to menibers of the Grand Army instead of being open to all survivors of the war. national colors covered the

fronts of buildings, were festooned at every convenient point, strung in rows at short intervals across the streets and completely covered the interior of the great convention hall, where the ses ions of the encampment, were held. Flag Recalls Gen. Grant-

One of the features of the parade was the presence of a big ting which covered the body of Gen. Grant on its way from Mount McGregor to the tonib. In custody of the grenadier guard, commandby Col. F. M. Sterrett of St. Louis of which every man was over six feet tall and each representing one of the forty-five departments of the G. A. R., this old flag brought up the extreme rear, escorted by the whole parade and being carried at last along the whole line of review.

As planned, the national officers in carriages with Gov. Charles E. Hughe led the line, the chief of staff in coinmand being J. Cary Winans of Toleds The department of New York State, although entitled by seniority to fifth place, selected as hosts the left of the line, which included a representation of every department, including Alaska and of every branch of the service. The parade was reviewed by Gov. Hughes

and the national officers of the G. A. R. The day's program began with a re ception at Congress hall, the New York State-hendquarters, in honor of Gov. Hughes at 11:30 a in. At 12:30 lunchcon was served by the department of New York to the Governor, Commander in Chief Robert B. Brown and his staff, past national officers, department commanders and the other distinguished guests. Meanwhile there had been reunions of the various organizations.

The real business of the convention began Thursday with the annual address of Commander Brown, reports of officers and committees and election

STEAMSHIP'S FAST TRIP.

Lusitania Croses the Atlantic in Five Days and 54 Minutes.

After 8 spectacular occan race against time, which held the attention of the world for five days, the Lusitania reached Sandy Hook lightship. The glant turbine liner of the Cunard

town in 5 days 54 minutes. The Lusitania beat the best time ever made by hor sister ship of the Cunard Line, the Lucania—five days, seven hours and twenty-three minutes -by over six hours, but was thirtyfive minutes behind the time set by the Jamburg-American liner, Deutschland,

Line made the voyage from Queens

Sixty-one years ago the little steam hip Europa of the Cunard Line, with old-fushioned engines, crossed the Atlantic from Liverpool to New York in eleven days and three hours, breaking the world's record at that time. Ther began the contest for supremacy of the sen which led to the building of the fleet Lusitania.

Lucania's record of five days. seven hours and twenty-five minutes, made from Queenstown to New York in 1894, was at an averag 21.81 knots over a course of 2,779 miles.

Then the North German Lloyd and American lines began to battle for the vestern record from Southampton to New York, which was held between 1893 and 1896, by the steamships Paris, New York and St. Paul of the Ameri-can Line.—The St. Paul-in: 1806-made the voyage in six days and thirty-one

minutes.
— Then the North German Island Compasy put over the Kuiser Wilhelm der Grosse and the new vessel in 1897 beame the marine wonder of the world when it hung up a record of five days, wenty-two hours and thirty-five minutes from Southampton to New York. The hiz Kaiser created a new record in 1899, when it steamed from Cherourg to New York, a distance of 3,050 miles, in five days, eighteen hours and fifteen minutes. This record was lowered in the same year by the Kalser to five days, seventéen hours and thir-

#### A CRIMINAL ENIGMA Constantine, Alleged Slaver of Mrs.

Gentry, Soon to Re Tried. The authorities of Cook county, Illinois, must soon about with a criminal engina whose crime shocked the whole country

and led to the crusade against law-break and led to the crusade against law-break-ors which for the time feing almost freed. Chleago of criminals. This man is Frank J. Constantine, slaver of Mrs. Louise-dentry. The fellow has spent several nonths in jail and his trial is about to open. It will be one of the invitest fough-there is little doubt in the public mind hat Constantine is the murderer, he will e ably defended and the evidence against lm is all circumstantial. The prisoner

is "of Italian birth and his mother runs

grocery store in New York.
Although he askats nothing, the police seert that they have him positively identified and that they not only have his own admission of his identity, made when he admission of his identity, made when he was arrested in New York, but that he made statements about the crime. Gentry was a young woman, married but a year, and lived in a flat where there were other occupants of similar tastes. Her husband was a man-of some means and they lived in a refined manner. In the latter part of 1905 a young man named Constanting came to live in the same flat and made the acquaintance of the Gentrys. He spoke of fine family connections and conveyed the impression that his people, who, he said, lived in New York, were rich. About 11 o'clock in the forenoon of Jan. 6, 1906, Mrs. Genry, fully dressed in street affired dashed down the stairs from her aparts

ments and rang the bell of a doctor's office on the ground floor, who, upon opening the door, saw her fall to the floor. Her throat was slashed almost. No. 2 white, one to from ear to ear and there was blood all white, 46c-10 48c.—
She pointed up the stairway in mute testimony that the attack had occurred \$6.10; what, No. 2, the file is \$1.00; when \$1.00; when \$1.00; when \$1.00; white, one to \$1.00; white, on

Suspicion at once pointed to Constan-tine because he had disappeared leaving his hat behind 'From that time or for-well over a year Frank Constantine was hunted as suspected criminals seidom are hunted, the chase leading through three continents, being participated in and urged on constantly by an aggravated no lice force aroused by a second women murders in Chicago.

Burglars entered the postoffice in Ashey and dynamical the safe, entirely de-nolishing the door. Stumps to the value were taken and some loose change er in the office.

William Green, the west Owosso hotel keeper who ejected an officer from his bar one Sunday recently, was fined \$25 when

reduced to assault and battery. At a depth of over 1,300 feet the Strasburg Oil and Gas Co. has found strong indications of oil. The company was formed some time ago by a number of farmers, the field being located in Ida township, west of Monroe. SAFE HOME FOR BIRDS.

Reservations in Gulf of Mexico Main

tained by Audubon Societies.

To make of the unknown inland region of the Gulf of Mexico one great eserve for the birds of the nation is the project which, it is announced, will immediately undertaken by the National Association of Audubon Socie tles, says the New York Post. Reports of a dangerous and difficult exploration of the remote sea isles of the coast of Louislana from the Sablae river to Pass a L'Outre have been Pass a L'Outre have been received from H. H. Kopman, the ornithologist, who was dispatched by the association everal months ago in quest of complete information on this practicalis unknown territory of the United States As a result it has been decided to add all of the insular tract, if possible, to the reservation of twenty-seven similar islands now maintained by the Audubon workers east of the Mississippl's mouth, as undisturbed havens for hosts of birds looking for breeding places.

Applications for the right to retain for this purpose such of these islands as are government property will be made by the Audubon association to the Federal authorities in the near future and every effort will be exerted to cure similar rights on islands held by private interests. On the formation of their coast reservation east of the Mississippi prompt assistance has always been given the Audubon workers by the government in the acquisition of island territory, but they have found it a heavy financial burden to acquire similar rights from private holders With the island stretch both east and west of the delta of the Mississippi ac unired, this country will afford its birds the most extensive and useful

reeding reserve in the world. The Kopman explorations, as report ed-to-William Dutcher president of addition to geographical, as well as ornithological records. Many islands not named on the official charts have been discovered, and several colonies of birds were found whose existence in these particular regions had been pre viously only conjectured. In all, some erons and gulls were found in breeding condition. Although on islands of the present Audubon reserve the birds have become so tame that they pay practically no attention to man, in a great many of the remote regions just isited they exhibited signs of feawhich showed unmistakably that they were frequently molested even in these inaccessible breeding grounds.

Most curious of all the observations the Audubon expedition were the "mudlimps" of the passes of the Mississippi outlet. These welrd Islands rise, sink and reappear elsewhere in an inaccountable manner, and are used by the timld bird flocks very extensively or breeding colonies. They often cover an acre and rise six or eight feet above high-tide level in their shifting processes. The action of gas and oil domes and the effects of sedimentation are variously assigned by scientists as the

nuses of these phe The exploration of this region is al most the final step in a general survey of the Atlantic coast line of the entire country, which was started at the upper boundary line of Maine some years ago At great expense the National Associa tion of Audubon Societies has now ob tained full and complete information of all the haunts and habits of the birds who frequent the east, coast country One more survey will be made, as soon as avallable funds warrant it, down to the lower extremity of the Texas coast Eventually, the Audubon workers in tend to continue these valuable and productive observations along the en tire line of the Pacific coast as thor oughly-as-they have covered the Atlan tle seaboard.

One of the most interesting features of the emperor's visit was the number of petitions which were, so to speak thrown at him during his fortnight's stay. Alrendy Dated.

In certain London railway stations the proprietors of the lunch counters a custom of dating eggs mark on the shell of a boiled egg the date on which it was laid The evident purpose is to reassure doubting customers; the possible result

mforting A party arrived at the station shortly before midnight, and following the habit of all American travelers, m at once for the lunch counter. They demanded eggs, and asked that they might have some of that very day's laying.

"Sorry, sir," said the clerk, "Today's heggs is all gone, but—" glancing at the clock, which pointed to quarter before twelve-"if you'd not mind the date, Hi could give you some of to-

A Blunder and Some Advice "We are sorry that Billy Bunker: your able technical article on 'How to Serve a Golf Ball' should have appeared in print as 'How to Curve a Moth Ball, but your handwriting certainly is atro-cious. It is true that the curving of a moth ball may sound ridiculous, but if he expected that the moth

editor would have around continuously in order to have little puzzles of this sort referred to him. Why not take adopens and secure a few valuable lessons on the art of serving a typewriter?" Cleveland Plain Dealer.

Many members of Congress who exect to be on the committees which will be called upon to make appropria tions for the Panama Canal are making arrangements to visit the before the session begins. They will do this for the purpose of seeing what work has been done, what is doing, and what is needed to be done. President, it is understood, is to give nore space to canal matters in his coming message than he has done hereto and Congress will need to inform itself on the subject at first hand, in order to act intelligently. The President made a trip to the canal zone last fall, and the result was quickly seen n some changes which he made in the working forces at the isthmus, and in legislation which he urged in a special nessage.

One of the objects of the coming visit of congressmen to the isthmus is to devise means to hurry the work for ward. As the army is in charge of the construction now, report says that far more progress is being made than was done during the civilian-regime And there is far less talking by the men who are doing the work. and there is no posing before the camera. During the administration of the civil ians the country quickly got familiar with the pictures of Wallace, Stevens. shonts and the others, but nobody out side of the canal zone knows what the present head of the constructive force looks like, and very few know his He attends strictly to business and the newspapers get no chance to

mention him. Still, it may be possible for the preslent and Congress to devise hurry up the work of canal building. by strengthening the hands of the army flicers who are in charge of affairs. If this can be done the country wants it to be done. The fact that the fleet for the Pacific will have to sail 15,000 miles to reach a point which could be reached\_in\_5 000 if the canal\_wore-con pleted is an eloquent reminder that short cut ought to be pushed with all possible speed. The country is spending a good deal of money in canal nore if the additional outlas bring completion a year or two earlier The Panama issue is one of the most interesting questions which will come before Congress this winter. - St. Louis

Chicago Democrats are hoping through the medium of the particular committee, to smoke out William Jer nings Bryan Chicago is hidding for but it fears that with Brean in complete control, he will switch the big gathering to some other ity for the reason that Chicago is my nibbling over with enthusiasm for the Peerless One

Ever since Bryan undertook to teach er Sullivan his duty as a Done there has been a growing revolu in Illinois against the Nebraskan, Sulvan, it will be recalled, is a member of the national committee, but Bryan claims there is a taint to the title, and hence personally advised him to retire. This impertinence brought a tart re om the off

an has not yet recovered. But the Democrats of Chicago don' atend this little partied and shall de prive them of the honor they seek friends to help them out, and as the rogram is designed to place Bryan on ecord, muinal advantage will be deved. The Missouri governor has a little bee buzzing in his bonnet. He knows he won't cut much of a figure; Bryan-tries to be the whole show while should the latter climinate him self, the Folk-boom-might-assume-dinensions. Several members of the naional committee are friendly to Folk. and if these can be lined up for Chicago, it is thought Bryan will be com-

pelled to\_announce his\_position consulted. Even as contageous a man as Watterson admits that Bryan the man who has done more than any other Democrat to disrupt the Democratic party, can and probably will, dondinate the next national convention. Yet how quickly life could be galvanized into that party were Bryan to announce his nt!=Toledo Blade

Wouldn't It Be Better. The constitution of the United States wisely provides that all meas

tres for the raising of revenue shall originate in the House of Representaives This is because the House of entatives is supposed to be class er to the people than any other body. Almost without exception our experience has shown that when matters like are left to the State Department the United States gots the worst of it ly to the spirit as well as to the letter of the constitution and let Congress pass on all these matters?-Cedar Rap-

Taris Reduction by Trenty.

The goods imported from Germany re virtually under the new agreement allowed to enter at the value certified y the German Chambers of Cor Thus the duty on German goods is less han that exacted upon the other countries, which are subject to an ad valorem rate of duty, because the lower the value at which imports are appraised the less the auty. Until we allow France, England and other countries the same favor it can hardly be called a square deak. The Manufac urers' Association and the stand-na ters object to this agreement with Ge e it thus reduces the rate

of duty in this round-about way .- S.ilem (III.) Democrat. A new prize of \$10,000 is offered in

France for the invention of a dirigible

Mr. Bryan and the Republican Party.
That Mr. Bryan will seek the Demo cratic nomination in 1908, and expects to receive it, is announced by a recog nized Bryan spokesman in New York city.

There is nothing surprising about It is a logical consequence of political developments in the last three

The national Democracy, as far as it nas an organized existence, stands for nothing but Bryanism. Mr. Bryan is its only presidential possibilty of na tional dimensions. Unless there is a revolution within-the party, either Mr. Bryan or some man selected by him will be the Democratic candidate.

What will be his chances of election To all clear-eyed and cool-headed observers they now seem better than in 1000, and almost as good as they were in September, 1896. The reason is not that the Democrat

e party has grown stronger, but that the Republican party has grown weak-er. So many consplcuous Republican enders have gone so far with Mr. Bryan that his caudidacy seems a log ical consequence of their campaign. To make the point clear, let us re call how Mr. Hearst, in his campaign for the New York Governorship, justified himself and his doctrines by print ing in parallel columns with his own views the inflammatory utterances of several national Republicans. How then, shall the Republican party, defeat Mr. Bryan? How save the country from the disaster of his election? Plainly it can do so only by adopt ing a platform of Republican and American principles, by selecting leaders whose lives and characters show both the ideals through which this naion has grown great and prosperous above all others, and by thus bringing the American people to a new birth of uope and faith in their country, its in

stitutions, and themselves. The outlook is not dark or discouragng. It is necessary only for the Re publican party to do its duty and at end to its business. It lms a year i which to accomplish a task more difficing with well braced end posts it just cult but of the same kind as that with which it grappled successfully in 1896. If the task is begun now with det mination, and is carried on in faith nothing wavering, we some day shall all look back upon 1908 as we now do upon 1806, and confess that nothing ut our own follies put us in fear .-Chicago Inter Ocean.

Prosperity to Stay Secretary Wilson of the Department of Agriculture has returned to Washorts of the ripening crops. The Westherton from the West with good rn farmers have plenty of money and re soon to have a great deal more since they are getting ready to send to narket enormous quantities of and other products. Good prices for them are amply assured. So the procis put into circulation is about to begin all over again under favorable conditions.

and speculation in Wall street and othr financial centers presumably increase during the next few weeks ince the moving of the crops wil cause the West and South to withdraw their surplus funds to be used in trans ictions throughout the regions of ac tual production. The easing process, often provided by the national treas ury, of preventing a breaking strain

by the deposit of government funds in enters will, come into play once more But while the big flusuciers are look ing glum and stocks are sagging or the exchanges the producers of the na tien will be largely increasing their

stores of money. That is prosperity. For the produc rs money soon flows back to the financial centers from the local banks where it has been deposited or from the cities where it has been exp for supplies. So long as it is not soundered in foolish speculation or last in the heart-breaking process of through unprofitable toiling of the soil or provide no remunerative prices for them, the country is truly prosperous. The curbing of the railthe products of the farms to market at a reasonable charge, is an important element in the present period of proserity. - Chicago News.

A Swing Around the West. Secretary of Agriculture Wilson has returned to Washington from a jour ney that lasted several secretary has a story to tell of general of the real article. He reports good everywhere in the West, with no symptoms of panic anywhere. Money he is convinced, is moving from West to East. Crons, with few exceptions The yield of corn promises to be large, and prices are unusually favorable to the farmer. Emigration to the new lands of Western Canada is falling of because the conditions and opportunities at home are more at tractive. Secretary of the Interior Garfield also is just back from travels the Southwest. His view of the sit uation and prospects is the same, and he finds the great irrigation projects moving along in-good shape.

The dwindling of speculative values in Wall street interests the West much less than the bulls and bears imagine. Perhaps the estimate is correct that stocks dealt in by Wall street have declined \$1,750,000,000 since the boots. ning of the year, but the values that make up the sum of activities in the West are not slirluking. Lands are not lower; the products of the soil manufacturing shows no falling off and per values in Wall street may be un-satisfactory to their chief manipulators, but the fletions they cultivate in be dispensed with to-public advantage,

its ways, and to divest itself of the at too much is used it will run out and idea that it is the pivot of prosperity grease everything that comes near. in the United States.—St. Louis Globe-Democrat.

Always feed fattening cattle to the

minute as near as possible. To keep them waiting an hour after the regular feeding time causes a loss of weight. Better knowledge of market condi-

tions is deserving of far greater atproducers of beef, and more thorough understanding of the demands of the milk annually leaving some trade is essential to the greatest success in supplying these demands. Colory likes a strong, deep, loams soil well manured and well drained.

Well-rotted stable manure is an exce lent fertilizer, though it may be ben-efited on most soils by the addition of 500 to 800 pounds per acre of a commercial fertilizer containing about 10 per cent of potash. M. Kule of North Yakima, Wash has a freak fruit which came as the result of pollenizing a peach with the

flower of an apricot. The fruit ripens and is gone by June 1. It is said to be sweet and of excellent flavor. It is reported that Mr. Kale has refused an offer of \$3.000, for one tree. Keep the blossoms picked off the pansy plants or they will cease to bloom,

as the production of seed is an end to flowering. Work a small quantity of fertilizer into the soil around each plant occasionally, and at the end of the year trim them much with straw, and the old plants can then be used

A daily newspaper in Washington prints as a remedy for nodular disease | er\_thrive\_with\_wet\_feet. Apple\_tree in sheep the following: "Shut them in a tight room and fumigate them which have long been neglected, are not with sulphur smoke, allowing them to worth saving; which either supply but scanty fruits inhale the smoke for fifteen minutes," over twenty, the pear over twenty-two This would undoubtedly kill all the or twenty-three, the plum over fifteen parasites in the sheep, but would as and the peach over twelve years of age certainly kill the sheep themselves.

> lons of this country, but the obstacle to its successful cultivation is the labor ing more serious than insects and fur of preparing it for market. There is a gous diseases is present, the orchard wide field for inventive genius in de-vising appropriate machinery for spetreating hemp and other flib plants which demand more labor in some sections than can be profitably be stowed on them.

> Gluten meal is that portion of the corn left over after the starch has been removed, and it is, therefore, a highly nitrogenous food. It should be fed in commonly known as the leaf-bl ction with other articles. middlings are used it is best to mix most injurious species. The structure, such foods with cut hay that has been habits and systematic position of these sprinkled as the unadulterated midliable to cause indigestion. Bran and linseed-meal form an excellent combination at all seasons, and promote digestion.

Violations of the twenty-eight-hon live stock law are costing the railroads on the country about \$10,000 a day in apple trees. On apple trees These fines have not been collected, however, and the railroad officials apparently pay no attention to the violation of the law, which prohibits the carrying of cattle in cars for more than twenty eight hours without food rest or water. They evidently figure that it is cheaper to pay the fines than to obey the law.

Grease or oil the wagons once a week bring excellent prices; the railroads if they are in constant use. Any of have all the business they can handle; the various axle grease mixtures on the market will do for heavy wagons, but thining grows from year to year. Pa. for light buggles and carriages there is nothing better than castor oil. Rebox clean with old newspaper, ther water and ring boards of directors can with a cloth wet in kerosene, which be dispensed with to-public advantage, will take off all old grease and directors. apply a small quantity of grease or oil

> Red Raspberries. I have tested all the leading varieties of red respherries and find the London

productiveness, with the Culbert sec ond, says a writer in American Agriculturist. These are both good varietles, good shippers and also good market varieties. We prefer the Loudon as a table berry, also for canning purposes. At also ships well, making a fine appearance in the box; having a deep red color, which does not fade in canning. Raspberries are good feeders, requiring a liberal amount of plant food and responding readily to good treatment.

The rose is not a natural climber; it can ramble over low shrubs, large bowlders and such things, but when rown about a veranda nillar it mus be artificially supported by tying up ceasionally as it grows. This is more satisfactory than ignoring it until the end of the growing season. It is then a hard job to straighten out the badly tangled or twisted shoots, and the wind is likely to break them when they are

very long. Never let one shoot grow upright for too long a period or get very far ahead of the others, advises a writer in the Garden Mazagine. If you do, the strongest or leading shoot will receive the greatest quantity of the sap and the plant, by throwing its strength to the top, will soon become nude at the base.

Variation in Plant Foods.

Plant foods vary in composition, and he most fertile farm may lack in particular element of fertility. Manure that does not contain all the essential elements that tend to recuperate the soil is not in itself complete. It will, of course, enrich the soil, but as the oll does not receive from the manur all that it yielded in the shape of food, no figures are necessary to de that in the course of time the sale of milk will exhaust the soil of plant foods (mostly of nitrogen), including potash, phosphates and other mineral It is admitted that a grass plot will be largely assisted to secure nitrogen by the rains (which bring down ammonia and nttric acid), and with clover (with the aid of bacteria). but these sources do not admit of deriving the potash and phosphates. The nitrogen so secured is but a small proportion as compared with that daily sold in the milk, the total amount of ng many hundreds of cans. The amount of nitrogen, potash and pho phates sold from farms that provide for large herds can not easily be estimated, but suffice it to say that the quantity, though not appare arge, and in the course of a few years. the soil must certainly be affected.

Neglected Old Orchards In ala ost any part of our State can he found orchards of advanced age which do not pay, and it is readily seen that something is wrong. The problem a large one and often proves to be very expensive. The causes which are responsible for an unprofitable orchard are many, and may be briefly stated thus: Unsuitable varieties, poor drain-age, unfavorable site, poor soil, neglect unfavorable climatic conditions and old

The first and most important point n rejuvenating an orchard is whether or not the trees are worth saving. The arieties may not be what you desire or too far gone to be responsive to reatment. If the trees are on wet and cut them down or thoroughly drain the soil, as a fruit tree will nevover thirty-six or thirty-seven years old, In fact, the trees which should not be worked with are those with a high Remp can be easily grown in all sec- head, partially decayed trunk and in a generally run down condition. If noth may be very economically reclaimed. Oregon Experiment Station.

> Apple and Penr Mites. In a study of the mites on apple and pear trees, five species have been recognized by the New York station: Eriophyes malifolia, E. pyri, E. pyri variolata, Phyllocoptes, and Epitrimerus pyri. Erlophyes pyri. When mite, is the most abundant and the pests are discussed and a list is given of all American species of the family with their host plants and an analyticol toble for their identification

Particular attention is given to E. pyri, which produces the well-known blister spots on the leaves of pear and ters may have a reddish tinge, but usually are less brilliant. The mites injure the fruits and fruit stems as well as the leaves, and have been found on 250 varieties of apples. After a little experience the injuries caused by mitch may be readily distinguished from those due to spraying or to the apple rust: A parasitic mite was found preying upon the blister mite and is described as a new species under the name Selus pomi

In experiments on apple trees a comparison was made between kerosens oil miscible oil, kerosene emulsion, whale-oll soap and the sulphur washes, the latter being prepared according to various formulas. On account of its harmlessness, cheapness and efficiency, kerosene emulsion diluted with five parts of water and applied during the dormant season is recommended as the most practical remedy for the treatment of apple orchards infested with the blister mite. In pear orchards this pest may be controlled by proper pruning and by spraying with empleion in the fall or enring.

## THE LOVING CUP

By Ida Alexander

The little old doctor lay awaiting the return of the big docto had been many of those visits at first —three—four—five a day. Now they had dwindled down to one. There had been no others in the long three weeks, yet he had never before been trained nurse had always been at hand, firm, capable, noiseless.

He did not exactly like her. had sent her for a walk, noting with quick, professional eye, the girl's pale heeks. He knew the case had been 30 minutes, and it was not likely she would return before that time.

He gave himself up to thought, and the thoughts were not pleasant. easily he had dropped out of the lives of our states—Massachusetts, Rhode of his people! How little it would Island, Connecticut and New Jersey have mattered if he had left them forshenherd that he had begun to look on the sheep as his own. Well, they had all forgotten him.

The doctor moved restlessly. Why, oven his present illness had been causworking for others. Five hours he had fought for the life of a little half-drowned baby. When the fight half-drowned baby. When the fight was won-and the thanks of the mother Mrs. Davis hurrying in search of him.

never quite acknowledged that they enjoyed centuries ago. the chill which ushered in pneumonia woman was the mistress of the had been caused by making Mrs. house; she inheritted equally Davis put on his heavy overcoat. Whatever the cause, the effect was only-too apparent. It had taken but

Ing to find its way from the little doc-

them in?" Thank you, if you will be so good, swered the doctor. "Why do you

"Well, at first you made me take some flowers away. I suppose I ought not to have bothered you with them hat nearly very one is so pleased to have them. Don't you like flowers?" Why, yes," said the doctor, "I am

But somehow he could not bring himself to explain to this matter-offact young woman that he had sent hem away because none of his people had cared enough for him to bring "Medicine first, then daffodils," said the nurse, smilingly:

basket of the flowers the big doctor saf by the bedside.

"Another present for the popular atient?" he asked. "Why, that reminds me I have a package and a letter. I'll get them. I've left them downstairs with my coat."

The little old doctor broke the seal with an apology. He could hardly wait to read the letter. Miss Lydia Dolliver had traced it in her stiff penmanship, of a fashion long gone by

Dear Emend: This loving cup issent to you by all of us who love you. Slove with the design on will be used Every one gave something, from Pinky for parades during national, state and nvery one gave sometiming from rinky for parades during national, state and Davis, who gave his candy penny, to city election campaigns, or upon any Malught Boone, who gave \$50. Now occasion when a display of particition that the danger is past, I'll tell you sentiment in wearing apparel is dehow we came to get it. We thought sired. The design is very simple and you were going to die. I put my apron over my head and I cried—cried as I character one was doing the same. By with the design on will cost 25 cents. Ones and twos they kept coming over my head and results as a control of the patriotic sentiment is always in the patriotic sentiment is always in a control of the patriotic sentiment is always in the patriotic sentiment is always in a control of the patriotic sentiment is always in the patriotic sentiment is always in the patriotic sentiment in wearing apparer is design in wearing apparer is design on the wearing apparer is design in wearing apparer is desin until it was like a party for numbers, and a funeral for faces. Then I told them about flowers. In that way we could show you what we have never ing the presidential campaign of 1908. could show you what we have never showed you, knowing all the time in my heart that then it would be too you were going to live-then I can't tell you. But I think we cried as much as at first. So God bless you. I supose you knew there were many who onored you. But I believe in telling before it is too late."

There was something about the littie doctor's face as he finished the letter which made the nurse retreat with her basket of daffodils. But the big new doctor cut the string of the nackage, and passed it unopened to the hands which released the letter.

Come, come!" he said at last, gruffly, through the catch in his throat. "This will not do-will not do! What are these precious neighbors of yours about? Trying to make you worse?

"No," said the other, gently, "they wouldn't try 'that—and they couldn't this way. I shall be better for it. You'll see." And the doctor, who had seen much, guessed that it would indeed he so.

He carried the picture with him, not knowing that it was because this hought in his cheery, tender heart hat the picture baunted him because was an unusual occurrence to see old, man sitting up in bed with sars running down on the hands ornialy field a loying cup.—

MAPPING THE WHOLE COUNTRY.

Great-Work Inaugurated by the Na-tional Government.

More progress than ever will be nade this year on the great map of the country which shows all the surand every house excepting where they season in 31 states and four territories. excepting in New York and Pennsyl and the work is boing vigorously pushed.

No country has ever made such rapid progress with its topographic States. Only a little more than a third of our territory is yet surveyed for the cheeks. He knew the case had been of our territory is yet surveyed for the a trying one. At any moment, she purposes of the big map, but this is might, come back; there was no merely because our land surface, inchance of her forgetting one dose of cluding Alaska, is nearly as large as the nauscous medicine. He turned to the whole of Europe. To make as good look at the clock. No, there were yet a map of our domain as that which we can now buy of nearly the whole of Europe we shall have to do nearly as much surveying as all the European powers have done together. Only four Island, Connecticut and New Jerseyhave so far been completely mapped: several other states will soon be finished.

The Egyptian woman is coming back into her own after many cen-turies. An Egyptian girl and a Mos-It was not such a long walk to the B. A. Two thousand years before little cottage where wee Pinky Davis Christ the Egyptian woman was the lay struggling for his breath, but the head of the house. The women of light had been cold, bitterly cold, Egypt are thus beginning to regain and them—well, even to himself he lem has just received the degree of her brothers, and had full control over her property. According to M. Par-teret, she was "juridically the equal only-too apparent. It and taken of 30 of man, having the same rights and years. Something very like a tear was try- She could also bring actions, and even plead in the courts. back, and the voice which answered authority in the temples. The girl She came in hushed and antiqued with the best walk," she said, invading Egypt probably will not have gratulations!" Then he went up the "And I've brought you a basket of the distinction of being the only alse to where the newcomers were way in which modern education is "And I've brought you a basket of the distinction of being the only iffodis—the darlings! May I bring woman of her country with a college em in?" degree-very long, as there is a move nent on foot to maintain a number of girls in colleges.

Hotel's Queer Guest.

A Central American monkey arrived at New Orleans on one of the fruit steamers and was given apartments at the Hotel Grunewald all by himself. Of course, he didn't get the bridal cozy soapbox in the baggage room sufficed for his comfort, and last night Mr. Monkey was still there awaiting a claimant.

When the haggage man was at the handed him a monkey, with instruc tions to check it to the Hotel Grune-wald, where he would claim it. At the hotel the baggage man collected his charges. But no one came to claim the monkey, or to make good the charges paid by the hotel. Instead of on and the hotel a white elephant.

Stars and Stripes on Gloves. A new glove design has been brought out for use on men's fabric He gloves only, the features stripes" in colors of red, white and the sale of her husband's effects was blue, according to Men's Wear. The purchased by John Graham. In the

Town Overrun by Snakes.
Collinsville, Conn., is overrun with

snakes. They are seen in yards, in cellars and in the streets, and daily reports are being made of killing them in\_dwelling houses and in stores. Large numbers of the ordinary blacksnakes have been killed, some of them being more than four teet long. Flat-headed adders have been killed in al-most as great-numbers:—Water snakesare nearly as common as grosshop

The generally accepted explanation for the appearance of the snakes is that lack of rain has caused all the small mountain streams to dry up, and the snakes have come to town for liquid refreshments.

Minnesota Tobacco.

Many farmers in Minnesota are growing tobacco on a small acreage this year and are realizing good profit from same. In some sections of the state farmers are planting 100 to 200 make a good revenue from it. Growat an expense of \$30 per acre so far.

Before the crop is ready to harvest it will cost in the neighborhood of \$75 ner acre. Tobacco in that section will realize about \$200 per acre, which is a handsome profit for the grower,— United States Tobacco Journal.

DRIVER TELLS OF STRAIN.

Nervous Tension of Man at Wheel of Automobile.

nervous tension under which the driver of an automobile racer labors has been graphically described by two Vanderbilt cup chauffeurs. Clement says: "When you first start, face—that is, until you get your auto eyes adjusted. But even then there's always the thrill, and you haven't e for anything but the thrill and watching of the long, parrow road in front. You haven't time to see what is on one side or the other. The peo-ple—that's about all we had on the sides in the Vanderbilt cup races-just seem to be a black-and-white bor der to the dark streak in front. Yes you realize it you are gone." eighth lap nearly eight minutes in the dizzy whirl, and my hunger amounte every minute counted. The constant crashing and lunging of the car, the vigilance required at the frequent turns, the haunting fear of fatalities and the anxiety regarding tires an mechanism were so exhausting that we lost over two minutes on the eigth round. Hunger remorseless and fanged was gnawing, gnawi gnawing with almost sinister pers ncy, as it seemed. So we began the

WAS GIVEN WRONG STEER.

Cleveland Man the Victim of Mean

A Cleveland (Ohio) man was com ing down from Toledo the other day when he noticed a little crowd on a station platform and at once conclud ed it meant the departure of a bride and groom. The train only stopped or two but the Cleveland ed, a young fellow on the platform dow and said, "Say, old man, hand seated and smilingly handed the card to the bridegroom. "What's this for?" growled the stranger. "Just married, aren't you?" the Cleveland man chuck-led. "Just married!" roared the stranger. "Just married! Why, you miserable shrimp, me an' my here are havin' a spat at this very mo ment over what we are goin' to do our 21-year-old son! Just mar-You measly little—" But the ried! vows he'll never again be ma catspaw for another practical joker.

Two Historic Cabarets.
Two old Sevres cabarets, each with an interesting history of its own, will be included in the porcelain sale Christie's, says a writer in the Pall Mall Gazette. The first, painted with festoons of flowers, was formerly the property of Marie Antoinette, and was given by Louise Lefevre, her valet de pled, to George Earl of Essex, and b in 1818, from whom it descended to the present owner, who is Miss Kelly's adopted daughter. The second painted with musical and amatory trowhen Prince of Wales to Mrs. Robthe colebrated actross and a purchased by John Graham. In the same sale will be found a Chippendale mahogany bookcase, exquisitely carv ed, which was formerly at the Kensington palace, in the room in which George II. died.

The insurance agent had exhausted is arts. With tears welling from his his arts. With tears welling from his eyes and in a voice quivering with emotion he had recitetd the harrow-ing tale of widow and orphans in dire distress through the untimely death of farmer was unmoved. "Nope, I guess I'll not take any today," he said, and reached for his red bandanna "But" gaid the wily agent. with every policy goes an almanac a plug of Greenville, a brass watch, an a plug of Greenville, a brass watch, an accorden and a bottle of liver medicine, besides a brass band to head your funeral procession. "Gosh ding!" Give me one. Nobody can ever say Joshua Hay neglected the welfare of his loved.

The Kaiser and Mr. Carnegle.
During the first meeting of Emperor William and Andrew Carnegie on the deck of the Hohengollern at Kiel, when there came a pause in the conversation, Mr. Carnegie, in a candid-spirit of banter, said to the emperor: "You know, your majesty, that I never cared very much for kings." "But there was one king you cared a great deal for," said the emperor quickly. "And who was that?" demanded Mr. Carnegie. "Robert Bruce." "Your majesty is very right," laughed Mr. Carnegie. "Robert Bruce is bur-ied in my town."

An Exhibition Stunt. "Malipedes are the fourth and fifth pairs of head appendages of chilo-pods," "What's that to me?" "Noth-I occasionally like to display a bit of knowledge that nobody else
